Product Introduction 產品簡介

The Founders of SWEETWATER witnessed firsthand, as they ventured deep into Central and South America with humanitarian organizations, the drastic effects of the global coffee industry on the environment and local farmers' quality of life. Each sack of green coffee, after being harvested with very little machinery and tooling, is brought down mountain roads on the worker's back – only to be sold at commodity prices to Western coffee manufacturers. SWEETWATER strives to end this cycle of unsustainable pricing and underinvestment in local farmers.

SWEETWATER supports small coffee farmers by aggregating demand of East Coast coffee roasters and placing predictable, stable and high volume orders, and sponsoring organic process adoption and certification thereby increasing crop quality and long term farm value.

The Arabica green coffee beans go through a rigorous selection process, leaving only the top 10% to be roasted to perfection. SWEETWATER coffee beans offer the most complex and richly flavored coffee with the most fair growing and trading practices. We primarily source Yirgacheffe, Guatemala, Sumatra, Columbia single origin coffee beans.
