WELCOME to Fastener Taiwan,

Dear friend,

We would like to extend our warmest welcome to you to the 5th edition of Taiwan International Fastener Show (FASTENER TAIWAN) that will be unveiled at Kaohsiung Exhibition Center from April 10 to 12, 2018. FASTENER TAIWAN is the only international B2B fastener show in Taiwan, serving as a trading platform for sourcing and procurement, drawing more than 410 exhibitors using 1,100 booths to showcase their latest products with innovative, integrated strengths.

Taiwan is renowned for its 60-plus years of fastener manufacturing history and has always been a stable supplier in the fastener industry, earning the global reputation as “the kingdom of screws.” The unique industrial clusters that synergize every facet of fastener related supply chains allow these products gain great popularity throughout the world for their prompt delivery, excellent quality and competitive utility.

In addition to its well-rounded exhibits, FASTENER TAIWAN is packed with abundant activities, including Global Fastener Summit, VIP Dinner, 1-on-1 Procurement Meetings, and Talent matchmaking. All serve as networking hubs for buyers, exhibitors and industry players to interact, explore future business opportunities and share market trends.

All the rich exhibits and featured events will surely make your visit full of business prospect and pleasure. Come join us at FASTENER TAIWAN. Don't miss out on this industry extravaganza of 2018!

See you in Kaohsiung.

Sincerely yours,

FASTENER TAIWAN 2018 Organizing Team

Organizers:

THE BUREAU OF FOREIGN TRADE (BOFT)

The Bureau of Foreign Trade (BOFT), which was established by the Ministry of Economic Affairs (MOEA) on January 1, 1969, is responsible for formulating Taiwan's international trade policies, promoting trade, and managing trade-related activities.

Jen-Ni Yang, the Director General of BOFT has served since August 20, 2014. Concurrently, she is also the Senior Negotiator of the Office of Trade Negotiations, Executive Yuan.

TAIWAN EXTERNAL TRADE DEVELOPMENT COUNCIL (TAITRA)

TAITRA is Taiwan's foremost non-profit trade promotion organization and was founded in 1970 to help promote foreign trade. Our efforts embrace market promotion, compiling and publishing trade information, organizing exhibitions, offering convention services, providing trade education and Taiwantrade, an e-Trading Hub Service. Besides being the largest exhibition organizer in Taiwan, TAITRA is also the administrator of Taipei World Trade Center (TWTC), Taipei International Convention Center (TICC) and TWTC NANGANG Exhibition Center.

Co-Organizer:

TAIWAN INDUSTRIAL FASTENERS INSTITUTE (TIFI)

Founded in 1969, Taiwan Industrial Fasteners Institute (TIFI) now has 673 members. Among all the members, Mr. Tu-Chin Tsai, Chairman of Sun Beam Metal Industrial Co.,Ltd., was elected to be the eighteenth Chairman of TIFI.

TIFI is committed to unite and promote the fasteners industry, to work with the Taiwanese government to implement economic plans as well as to coordinate industry relations to enhance common interests.

2018 Taiwan International Fastener Show Exhibition Information

SHOW DATES :
April 10-12, 2018

SHOW HOURS :
9 AM ~ 5 PM

- Children under 12 years of age are not admitted to the showground.
- Please wear proper attire.

VENUE :

Kaohsiung Exhibition Center
Addr.: 39, Cheng-gong 2nd Road, Qianzhen District,
Kaohsiung, TAIWAN

EXHIBIT SPACE (PROJECTED) :
20,000+ square meters (gross)

NUMBER OF EXHIBITORS & BOOTHS (PROJECTED) :
410 exhibitors, 1,100 booths

EXHIBIT PROFILE :

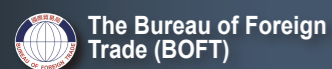

- Nuts, Bolts, and Screws
- Fastener Tools
- Meters and Instruments
- Wire & Raw Materials
- Fastener Manufacturing Equipment

FEATURED EVENTS :

- Global Fastener Summit
- VIP Dinner
- 1-on-1 Procurement Meetings
- Talent Matchmaking

(Figures of Fastener Taiwan 2016)

Current Status of Taiwan's Fastener Industry

In 2016, the total export of Taiwan fasteners decreased by volume and by value due to global market downturn and harsh international competition. There was also a speculation that the EU's abolition of the anti-dumping duties against China would bring negative influences. The impact of this pessimistic outlook lasted until the beginning of 2017. However, if we review the performance of the global market in 2017, we can observe comprehensive and synchronous recoveries in all countries for the first time since the financial tsunami occurred. With growing demand for fasteners in developed countries like the United States, the European countries and Japan, there was a significance increase in Taiwanese fastener export in 2017 when compared to the previous year.

Taiwan's Fastener Export

From January to November in 2017, Taiwan screw product export increased 4% to 1.45 million tons while the value went up 12.8% to US\$ 39 billion when compared to the same period in 2016. The average export price of screws valued at US\$ 2.679/kg, which translates to an annual growth rate at 8.51%. There was a trend of increase in volume and price.

Taiwan's Fastener Export Destinations by Countries

The top 3 export destinations for Taiwan fasteners from January to November in 2017 when compared to the same period in 2016 were as follows: the United States ranked at the top with US\$ 1.51 billion, amounting to a 38.7% market share with an increase of 12.6%; Germany ranked second

with US\$ 356.57 million and a 9.14% market share that increased 15.2%; and Netherlands ranked the third largest with US\$ 214.56 million and a 5.5% market share that increased 13.5%. The following top ten countries continuing the list included Japan (+14.6%), UK (+7.4%), China (+22%), Canada (+20.9%), Italy (+17.8%), Sweden (+14.2%) and Mexico (+16.6%).

Taiwan's Fastener Import

From January to November in 2017, Taiwan screw product import decreased 6.8% to 17,400 tons while the value went down 1.6% to US\$ 125 million when compared to the same period in 2016. The average import price of screw products valued at US\$ 7.186/kg, which translates to an annual growth rate at 5.6%.

Taiwan's Fastener Import Origins by Countries

The top import origin for Taiwan fasteners from January to November in 2017 was Japan. The total value was US\$ 52.75 million, accounting for 42.2% of all the imported fasteners with a decline in import volumes at 9.8% when compared to the same period in 2016. The United States was the second-largest provider, totaling US\$ 21.69 million and accounting for 17.4% of the market share with a decline in import volumes at 5.2%. The third import origin was China, totaling US\$ 12.02 million and a 9.6% market share with an increase since 2016.

Analyzing Taiwan's Fastener Production & Sales in 2017

Taiwan fastener industry plays an important role in generating foreign exchange. The export ratio in Taiwan accounts for 90% of all goods

produced. With the rise of China's supply chain, the competitions in the international markets have become fiercer. In recent years, products including standard small screws made in Taiwan have been hit hard by competing Chinese products. Overall, Taiwan's 2017 export orders were stable in the U.S and Japanese market while we saw growth in the European market.

When viewing product types, we see that orders for small screws and bolts have increased

in 2017. On the other hand, value-added products like automotive fasteners produced in Taiwan also have advantages over other exporting countries. The market share of Taiwan's automotive fasteners has gone up from 23%-28% in the last five years to 31% in 2016. In the meantime, since the automotive markets in the ASEAN countries have grown substantially, those countries will become potential markets for Taiwanese automotive fastener manufacturers.

TABLE 1. Export of Screw Products in 2017 (Jan.-Nov.) by Country (including steel nails)

Country	Volume (KG)				Price (US\$)				Average Price (US\$/KG)

Belgium	17	18,439,526	1.27%	1.79%	16	49,987,626	1.28%	12.37%	2.711	10.40%
Vietnam	15	19,330,959	1.33%	-3.04%	17	47,362,116	1.21%	11.89%	2.450	15.40%
India	19	12,673,257	0.87%	-1.27%	18	34,434,839	0.88%	12.52%	2.717	13.96%
Russia	18	16,108,058	1.11%	9.51%	19	29,466,018	0.76%	12.23%	1.829	2.49%
Saudi Arabia	20	10,266,940	0.71%	-19.32%	20	18,771,958	0.48%	-18.90%	1.828	0.52%
Others		164,136,912	11.28%	1.70%		456,677,651	11.71%	10.45%	2.782	8.61%
Total		1,455,703,797	100.00%	3.96%		3,899,637,428	100.00%	12.80%	2.679	8.51%

Benefiting from factors like rising steel prices in the second half of 2017, the increase in volumes and prices of value-added and customized products has allowed Taiwan fastener industry to differentiate itself from the low-priced, standard products from China.

The International Monetary Fund (IMF) raised the forecast for global growth to 3.6% in 2017 and 3.7% in 2018. The IMF also expects a higher global trade volume, demonstrating a rather positive

outlook towards global economic recovery. Besides, US Housing Starts and Durable Goods Orders are optimistic and the economy shows steady expansion. Since Taiwan fastener industry was not impacted by the EU's lifting of China's anti-dumping duties and Japan's elimination of preferential tariffs on steel screws from China starting April 2018, the industry is relatively competitive in the global markets. However, Taiwan's fastener industry should still pay attention to the adverse effects of a stronger NT dollar.

TABLE 2. Import of Screw Products in 2017 (Jan.-Nov.) by Country (including steel nails)

WHY VISIT FASTENER TAIWAN?

Fastener Taiwan is **the world's No.3, Asia No. 2** Fastener Show.

Taiwan is **the world's 3rd exporter** of Fastener.

More than 400 exhibitors & 1,100 booths

Exclusive **Well-developed** Clusters

30 minute drive to the industry cluster

Broad Spectrum of Fastener Products

Proven capacity for supplying custom-spec fastener products

TAITRA OVERSEA OFFICES

Visiting Incentives for Qualified Buyers

Fastener Show offers visiting incentives to qualified overseas buyers. Please contact your nearest TAITRA office for more information on our limited offer. If you do not find any office in your country, please contact fastener@taitra.org.tw, we will be more than happy to assist you.

How to Get to Kaohsiung Exhibition Center?

Address:
No.39, Chenggong 2nd Rd.,
Qianzhen District, Kaohsiung
806, Taiwan

Kaohsiung Exhibition Center (KEC) is located at the hub of the Kaohsiung Asian New Bay Zone and is easily reachable by different modes of transportation including air, sea and land, such as the hi-speed rail from Taipei and other cities in northern and middle Taiwan.

Flights

There are direct flights from over 40 major Asian cities to Taiwan Taoyuan International Airport and Kaohsiung International Airport.

Taiwan High Speed Rail (THSR)

High Speed Rail connects from Taipei in 1 hour and 30 minutes. The terminal in Kaohsiung is Zuoying Station. From Zuoying Station, you may take a 20-minute taxi ride to KEC, or take the Kaohsiung Mass Rapid Transit (KMRT) System to Sanduo Shopping District Station (R8) with a 10-minute walk to KEC.

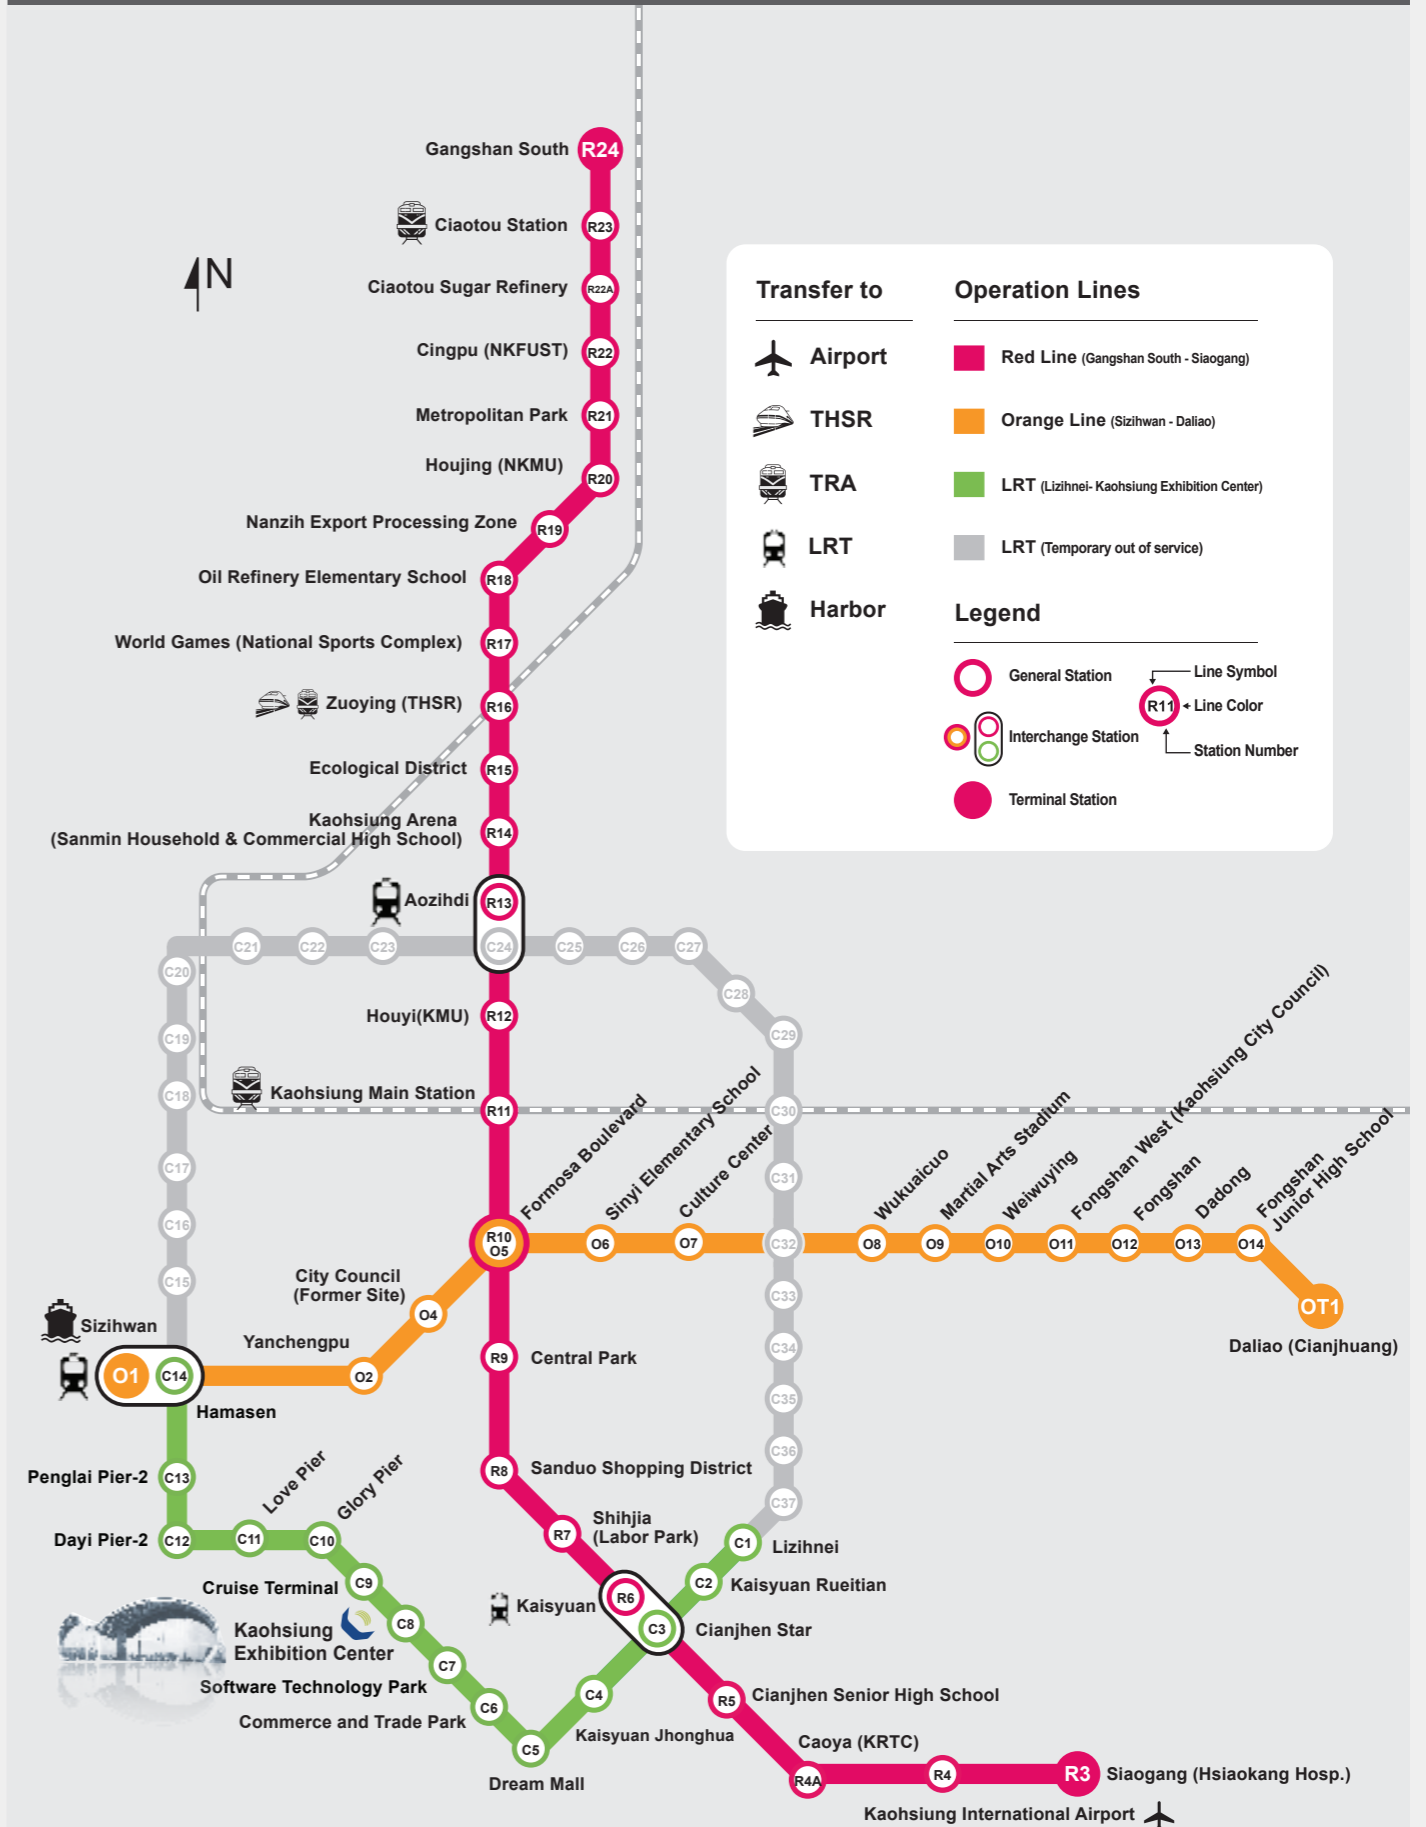

Kaohsiung Mass Rapid Transit (KMRT) System

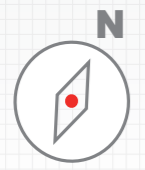

Sanduo Shopping District Station is the closest station to KEC. Exit from Exit 2, and KEC is a 10-minute walk away.

Free Shuttle Bus from KMRT

There are free shuttle buses from KRT Sanduo Shopping District Station (Exit 2) to KEC during the show period of FASTENER TAIWAN.

Da-Dong Art Center

Creative, Amazing, One only in Taiwan. The Da Dong Art Center is positioned as a multi-functional art space. It boasts multi-purpose performance halls, commercial creative art space for exhibitions and an unique art library. New Artistic Nucleus The Da Dong Art Center began operations in early 2012. It is integrated nucleus that supports all artistic and cultural activities. The space is designed to respect our natural environment, half of the center is an outdoor space that maximizes the utilization of natural environment, such as breezes, light and rain etc., to create an oriental Zen atmosphere.

Dome of Light

The Dome of Light is one of the largest glass artworks in the world. Designed by a Italian artist Narcissus Quagliata, the mesmerizing attraction is composed of individual pieces of colored glasses that are placed together to convey the story of human life. Gaze up at the masterpiece to make out the intriguing shapes and try to understand its concept. Capture photos of this exceptional work of art in the MRT station. Examine its themes that represent stages of life. These include "Water: The Womb of Life," "Earth: Prosperity and Growth," "Light: The Creative Spirit" and "Fire: Destruction and Rebirth." Appreciate its general message of love and tolerance.

Love River

Walk along the banks of Kaohsiung's culture core, where you will find a night market, a harbor and scenic parks. Ride along the cycle path on a bike, you can select from one of the rental stations in the city, stay to watch the sun go down over the sparkling blue river and see the sky change its colored hues. Many parts of the river offer a panoramic view of skyscrapers in the business district, and the flashing lights of the city's nightlife in the evening. Many cafés and restaurants along the riverbanks are open for hours. Stop and enjoy a brief break over a traditional Taiwanese tea or cup of coffee and capture photos of the wide river and its bridges.

Urban Spotlight

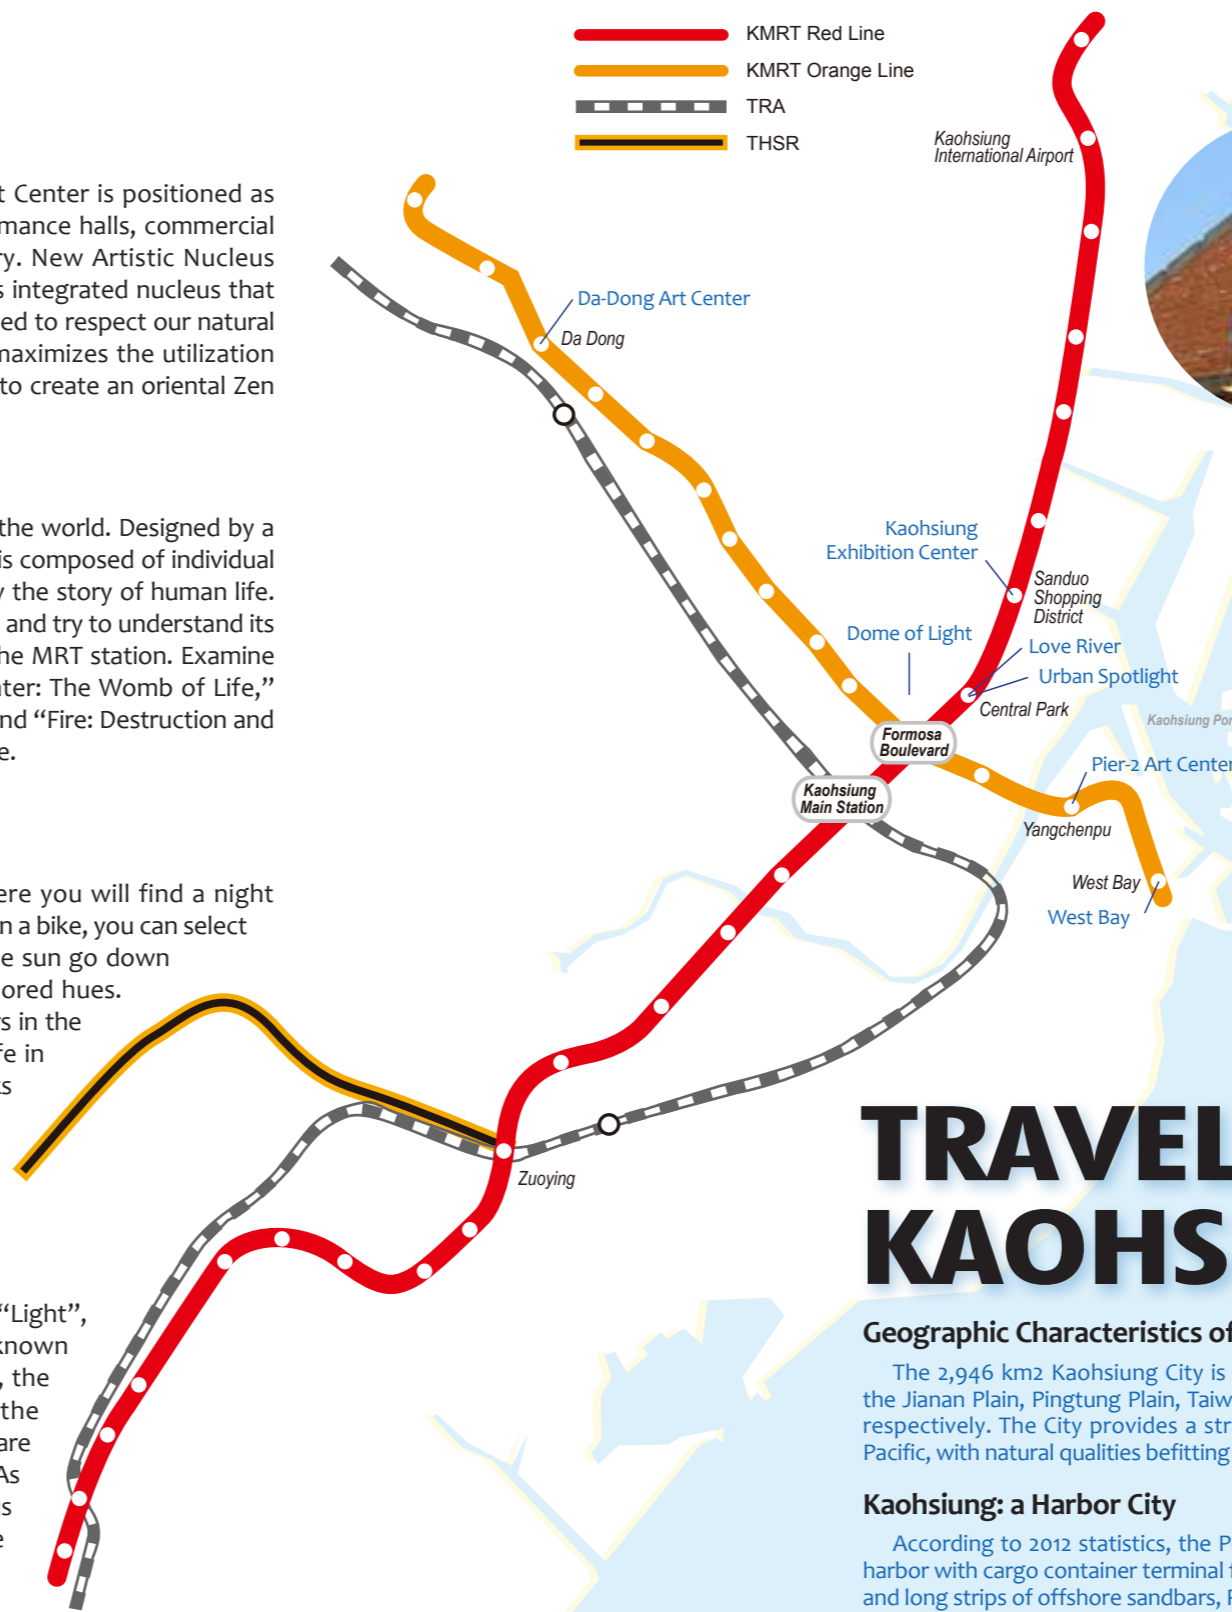

Its full length is about 150 meters long, in the theme of "Light", a vivid passage is designed by eight artists in 2001 and is known as Urban Spotlight. As you enter the Urban Spotlight area, the background music of jazz or Hip Hop will let you enjoy the atmosphere, there is no hustle or bustle, no busy traffic, you are able to experience arts and crafts here in a relaxed mood. As a new landmark for Kaohsiung, Urban Spotlight is a glorious pearl shining in the dark. Please enjoy a cup of coffee at the outdoor café.

West Bay

The Cijin Seaside Park is a long area of picturesque terrain along the west coast of Cijin Island. Take a leisurely stroll past intriguing architectural designs with a constant view of the Taiwan Strait. The park incorporates a long path for walking and cycling as well as an ecological area and Cijin Beach, you can choose to stroll down the beach to admire the views of sea and spot surfers approaching the rough waves to practice their moves or sit with a picnic or enjoy fresh seafood from one of the restaurants facing the beach. The area is famous for its sunset, spend a romantic evening with your friend watching the sun go down over the golden sea is also a good choice.

Pier-2 Art Center

Pursuit fascinating works to learn about Taiwan's edgy art scene in the dystopian setting of abandoned warehouses by the sea

Set in the retro location of a site of abandoned warehouses, Pier-2 Art Center has been brought back to life as a thriving contemporary art scene. Visit this hub of creativity and imagination, where graffiti stands next to iron works, sculptures and modern paintings. The site comprises several storerooms, each with their own distinctive style and theme. The Pier-2 Art Center is next to Kaohsiung Harbor, right in the heart of the city. Ride the metro to Yanchengpu station and walk southwest for a few blocks to reach the gallery. While you are here, walk the short distance to Love River, where you will find scenic parks, museums and cafés along the banks.

TRAVEL KAOHSIUNG

Geographic Characteristics of Kaohsiung

The 2,946 km² Kaohsiung City is a vertical strip of land in Southwestern Taiwan, bordering on the Jianan Plain, Pingtung Plain, Taiwan Strait and Bashi Channel to the north, east, west and south, respectively. The City provides a strategically located pathway from Northeast Asia to the South Pacific, with natural qualities befitting a good commercial harbor as well an emerging cosmopolis.

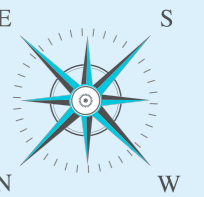

Kaohsiung: a Harbor City

According to 2012 statistics, the Port of Kaohsiung (PoK) is the world's 13th largest international harbor with cargo container terminal facilities and ranked No. 1 in Taiwan. Blessed with a warm climate and long strips of offshore sandbars, PoK lies along a perfect coast with 26.66 km² of navigable water, an 18 km long navigation channel and two harbors accommodating ships of up to 100,000 tons. It is also the centerpiece of local tourism, and comparable to any other world-class harbor in scenic beauty.

Kaohsiung Exhibition Center

The Kaohsiung Exhibition Center was established in 2000. Its purpose is to provide a place for holding international conferences and short-term trade shows. The exhibition center is the first multifunctional waterfront venue for exhibitions in Taiwan.

Why Sould You Visit

2018 Taiwan International Fastener Show ?

TORQUE INTERNATIONAL - The Taiwan International Fastener Show is an important trade fair for European fastener buyers, particularly for those wishing to source new fastener manufacturers. The hundreds of fastener producing companies situated relatively close to the show grounds mean the event is markedly worthwhile to visit, with the chance to combine a visit to the show with trips to factories – something few other global fastener show can offer. Visitors come from some of Europe’s largest fastener markets - including Germany, Italy and Great Britain – with visitors keen to access the manufacturing capabilities of the exhibiting fastener manufacturers.

FASTENER TECHNOLOGY INTERNATIONAL - The fastener industry is global and Taiwan products and technology are a large part of this overall business. Trade shows are the prime opportunity to see and understand developments in product and application for the fastener industry professional. Under one roof you can visit with leading companies from Taiwan and the rest of the world and talk with their personnel about the latest developments and how they might improve your own business. The Taiwan Fastener Show is a leading resource for any fastener industry professional to help them stay on top of industry and product trends.

FASTENER EURASIA - Because Turkey is a big market for Taiwanese manufacturers and Taiwan is an important supplier country of fastener and fastener technologies for Turkish companies. Hosting a show like this in Taiwan provides great opportunity to find the latest innovations about fastener industry and to meet demands of quality fastener products.

REVISTA DO PARAFUSO - As reporter of the Revista do Parafuso (The Fastener Brazil Magazine), I attended the Taiwan International Fastener Show 2012, my first visit to country. Since so, I have suggesting for fastener market players from Brazil to put in calendars this global event. Taiwan is a beautiful and very well organized country, and this fastener show is just a mirror from this. However, in my country many people not know about Taiwan and this show. So, in 2018 I will be present, to make a covered for Issue RP69 (May 2018), with many information for our 8,000 readers.

"FASTENERS, ADHESIVES, TOOLS, AND..." - Experienced traders and manufacturers of fasteners from different countries emphasize Taiwan. They know that the production of many types of fasteners and equipment for its production is concentrated here. Therefore, the exhibition Taiwan Fastener Show is for them of special interest. This is not only the opportunity to gain access to make personal contacts to the top-management of the companies; it is also a possibility to visit at the same time the fastener factories, most of which are located near Kaohsiung. Today, those who work on the global fastener market, give a high appraisal of Taiwanese products. They closely monitor the dynamic development of the industry. Taiwan Fastener Show gives a full picture of the proposals from the leading Taiwanese companies.

Hotel List

To provide better services for the exhibitors and the visitors, TAITRA provides special rates for the accommodations in Kaohsiung during **2018 Taiwan International Fastener Show** as follows:

Transformation and Upgrading of TAIWAN'S SCREW and NUT INDUSTRY

Seeing the Rise of Traditional Industries from the "Kingdom of Screw Fasteners" to the "Medical Silicon Valley"

Writer: Li Hui Liu, IEAT
Translation: Worldwide Serices Co., Ltd. (WWS)

Since its development from the 1950s, Taiwan's screw and nut industry has been evolving alongside global industrial changes, and has constantly worked to transform and upgrade itself. Previously known as the "Kingdom of Screw Fasteners," Taiwan has been developing high-end applications in automotive and aerospace industries. Over the past decade, the Taiwan Fastener Industry has also started to develop specialized medical equipments such as artificial tooth roots, attempting to establish a local "Medical Silicon Valley."

Taiwan's industrial manufacturing sector occupies a pivotal position in the world. The Central Taiwan region alongside the Dadu Plateau

is home to the world-famous precision machinery hub, earning the name of the "Golden Dadu Mountain Ridgeline." Down to the southern part of Taiwan, the screw and nut industry hub in the Gangshan District houses over 600 factories with 15,000 employees. For years, this industrial hub has been producing high-quality screws and nuts for customers across the globe, and has been nicknamed the "Screw Cave." If we include all the other fastener manufacturers in the Luzhu District and those in Tainan City, there are 1,500 screw and nut factories with more than 30,000 employees in total across Taiwan. Taiwan is among the top countries that have the largest export volumes of screws and nuts, hence its reputation as the

"Kingdom of Screw Fasteners."

In recent years, Taiwan's screw and nut industry has met the challenges posed by rising Chinese manufacturers who are able to keep up with the latest technology. In order to stay competitive, Taiwanese manufacturers have been investing resources in transforming and upgrading. They not only produce fastener products for high-end applications in automotive and aerospace industries, but also convert them into products of higher value such as artificial tooth roots or artificial bones. Their efforts have helped Taiwan transform from the previously regarded "Kingdom of Screw Fasteners" into a modern "Medical Silicon Valley." With all these innovations, Taiwan's exports of screw and nut products continue to grow and will create higher production value for Taiwan's traditional industries in the future.

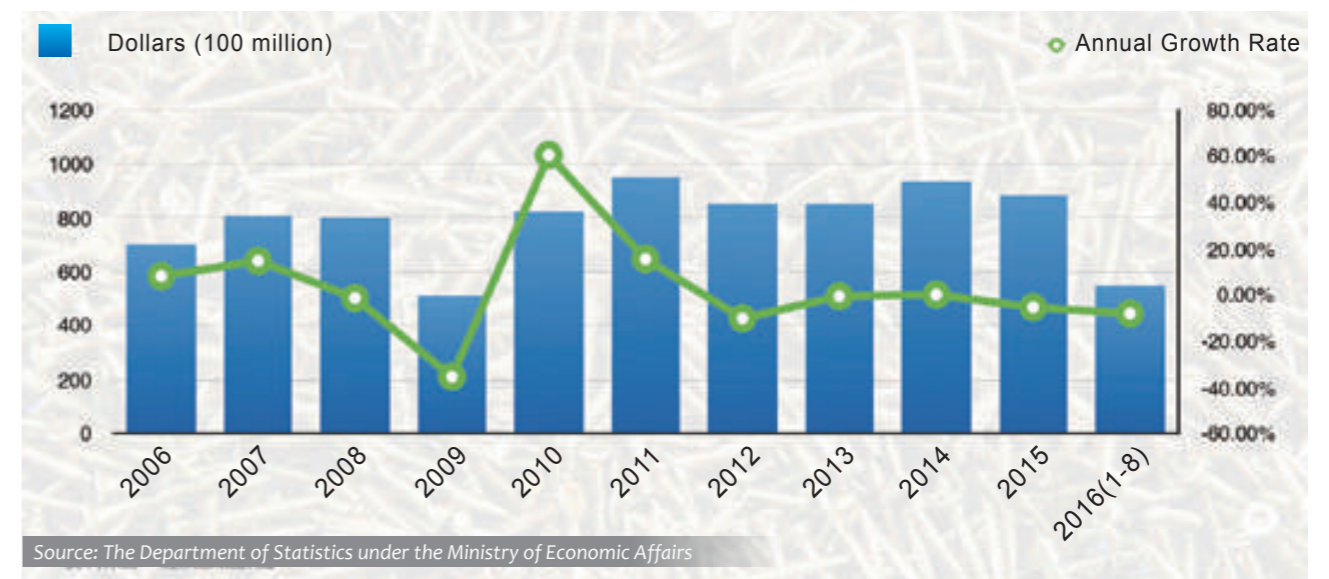

Competitive Advantage of Taiwan: Number One Exporter of Screws and Nuts to The U.S. and Europe

Looking back at the development history of Taiwan's screw and nut industry, the domestic and foreign demand for screws and nuts were high after the end of the World War II. At that time, the

basic industries in Taiwan were still in their infancy and the screw and nut factories sprang up in this environment. At the peak of this industrial period, the volume of Taiwan's screw exports occupied the forefront, accounting for as much as 30% of all global shipments.

In the last decade, the overall share of Taiwan's exports of screws and nuts decreased year by year as many factories in China and Southeast Asia attempted to grab more market share at lower prices. Subsequently, many Taiwanese manufacturers turned to developing high-end products. Even though the export volumes dropped at that time, the production value did not shrink accordingly. In 2011, it even hit a record high of NT\$ 95.3 billion. When the slowdown in global steel prices and the fall-out of the European debt crisis occurred in 2012 and 2013, the production value only decreased slightly. Thanks to the recovery of U.S. and European markets in 2014, the export demand grew again and the production volumes rose markedly. The production value returned to the level of NT\$ 93.6 billion, ranking as the second highest compared to previous years. Compared to that of 2013, the production value went up by 10% in 2014. Although it decreased slightly between 2015 and 2016, it was

Trend Chart/Production Value of Screws and Nuts between 2006-2016

affected by the overall economic environment at that time and less by the rise of fastener industries in emerging countries like China. These statistics demonstrated that Taiwan's fastener industry had a successful transformation and has been able to maintain its competitiveness over time.

As Taiwanese manufacturers continued to tap into high-end markets, developed countries and regions like the U.S. and the European Union (EU) had all become Taiwan's major market destinations for exports. According to the Department of Statistics under the Ministry of Economic Affairs (MOEA), about 80% of the screws and nuts are for direct exports. From January to September 2016, the U.S. was Taiwan's top export destination, accounting for 37% of Taiwan's total exports. The EU with a share of 34.2% then followed this. The U.S. and the EU together accounted for 71.2% of Taiwan's total exports. From January to August 2016, Taiwan's share of screws and nuts topped the markets with 31% of the total imports into the U.S. and 26% into the EU. The result showed that the successful transformation of our screw and fastener industry could be the model for other traditional manufacturing industries in Taiwan.

Both Industry Efforts and Supporting Policies Create Robust Screw and Nut Industry

Mr. T.H. Chang, former Chairman of the Taiwan Industrial Fastener Institute (TIFI), pointed out that when our screw and nut industry underwent international trade challenges, Taiwanese manufacturers have always focused on R&D and innovation, pursuing the transformation and upgrading of the industry. Subsequently, the product line expanded from general use to applications for high-end markets such as automobile, rail and aerospace.

As time goes on, Taiwan's screw and nut industry becomes more robust as it grows. For example, Taiwan Shan Yin, located in Benjhou Industrial Park, has been transforming itself based on industrial changes over its 30-year corporate

history. Due to the lack of key processing technologies for surface treatments for the screw and nut industry in Taiwan, Taiwan Shan Yin started to research and develop new coating technologies more than a decade ago. Taiwan Shan Yin's own "independent nano-scale surface coating technology" later helped transform itself to become a professional screw and nut manufacturer for applications in the consumer electronics industry, the automotive industry and the environmental protection industry. Taiwan Shan Yin has now successfully entered the high-end market of screw and nut industry by joining the supply chain system of Japanese automaker such as Subaru and Honda as well as the German-based company Volkswagen.

In order to continue the achievements of innovation and transformation for the screw and nut industry, the Taiwanese government continues to devote resources to help manufacturers to transform and upgrade themselves. For example, the Industrial Development Bureau (IDB) launched the three-year "NICE Upgrading and Transformation Plan" over this past year (2016) for the screw and nut industry. The plan deals with four main aspects: niche products, intelligent equipments, competent workers and eco-friendly production processes. It aims at optimizing the structure of the screw and nut industry to develop products with a higher value, raising export unit prices, stabilizing export growth and eventually avoiding the predicament of price-cutting competition in the global market.

Alchemy of Traditional Industries: Screws Used as Artificial Tooth Roots

In addition to the current developments in the high-end markets such as the automotive, aerospace and construction industries, there are many Taiwanese manufactures that are also developing medical equipments of higher value in recent years. Not only do they want to maintain their competitiveness but they also want to create the future of the screw and nut industry with "vision" in mind.

Mr. Chih-lung Lin, the deputy chief executive officer of Metal Industries Research & Development Centre (MIRDC), summarized the transformations that the industry has gone through. "In the past, people didn't think the screws would have anything to do with the medical industry. Nowadays, using the screws as the artificial tooth roots has become popular. The traditional screw industry is now linked with the high-tech medical equipment industry." Lin went on to explain that the production value of artificial tooth roots has risen sharply because of the global aging trends. Since Taiwan's domestic dental science has an advantage over other countries, the Taiwanese government commissioned the MIRDC to execute the "2007 Biomedical Device Industrial Cluster Development Plan." The plan brought together the clinical information from doctors and the research results of the universities to help the traditional industries enter the medical equipment industry.

At that time, Taiwan's fastener molding factories like Hung Chun Bio-S Tech and Alliance Global Technology have begun to research and produce artificial tooth roots. From 2012 to 2015, the MIRDC was commissioned by the Department of Industrial Technology (DoIT) to re-implemented the four-year "High Value Innovative Dental Implants R&D and Medical Equipment Industry Services Plan." The plan was based on our traditional industries and information and communications industry to

develop the digital dental industry and therefore make Taiwan's dental equipment industry chain more complete. Companies including Hung Chun Bio-S Tech, Taiwan CareTech, Coho Technology, Alliance Global Technology and many others have developed competitive products one after another. Global customers are able to purchase a wide range of high-end dental services and equipments from surgical handpieces, collagen fillings, dental braces, dental CT, ceramic tooth roots, dental milling machines to dental implant guidance system from Taiwan. Taiwan has now established competitive advantages for itself in the artificial tooth root industry.

Alliance Global Technology Actively Builds International Brand Image

In the past, Alliance Global Technology used to be the internal R&D center for Anchor Fasteners Industrial Co., Ltd. Based on its technical foundation and experience in high-end industries like automobiles and aerospace, Anchor applied its new technological advances in screws and nuts to the fields of orthopedics and dentistry. After Anchor obtained considerable results from R&D, it built a factory in the Kaohsiung Science Park (KSP) in 2007 for small-scale production of artificial tooth roots, orthopedic bone screws, orthopedic bone plates and equipments for minimally invasive surgery. Alliance Global Technology was founded the next year and started to market its artificial tooth root brand, Anker, globally.

Ms.Ya-Yuan Zhang, the vice president of Alliance Global Technology, explained that even though their company is competitive in the automotive and aerospace industries, the market size is quite limited. Therefore, it is necessary for Alliance Global Technology to develop other high-value products to maintain corporate sustainability. Because the technology used in the first stage of precision processing of its aerospace fasteners can be applied to orthopedic bone materials and orthodontic

materials, Alliance Global Technology has therefore decided to dive into the research and development of medical equipments for orthopedics and dentistry.

Alliance Global Technology has been working closely with many research institutes like National Taiwan University (NTU), Kaohsiung Medical University (KMU), Taipei Medical University (TMU) and the MIRDC. The research on artificial too roots and abutment tooth has successfully generated new technologies such as high-precision forming technology, high-end surface treatment, Class 1000 Cleanroom packaging, making Anchor a company with strong R&D power.

Mr. T.H. Chang, as the chairman of Anchor and Alliance Global Technology, is proud to announce that not only does Anker gradually build its brand awareness in Taiwan, it also obtain global certifications such as the CE mark, the FDA certification and CFDA certification that are essential to enter the global marketplace. He looks forward to witnessing the fast success of Anker artificial tooth roots to eventually becoming among the top five brands.

In the past, screws and nuts were deemed as low-end products. Nowadays, they are transformed into medical equipments with higher prices. A piece of artificial tooth root now costs NT\$5,000, which is the total value of hundreds of thousands of screws. We can clearly see the high value of innovation in the screw and nut industry as well as the benefit of transformation and upgrading.

A Glimpse of

2018 Taiwan Fastener & Machinery Products

RAY FU is a professional fastener manufacturer that started manufacturing and services beginning from the year of 2000 in Kaohsiung City in southern Taiwan, with strong dedication to producing various fasteners and steel wires.

Ray Fu is internationally recognized for our integrated production capability with support from steel wire factory, "Chen Nan Iron Wire Co., Ltd.", which is also located in Kaohsiung. Inside Chen Nan factory, there are wire rod warehouse, spheroidizing annealing furnace, pickling surface equipment, wire drawing machines, and screw makers. With Chen Nan directly supplying raw materials, Ray Fu is able to work with customers for highly custom-made products.

Ray Fu supplies an extensive range of products: self drilling screws, drywall screws, chipboard screws, self tapping screws, collated screws, window screws, concrete screws, decking screws, roofing screws, machine screws, automotive screws, special screws, bolts, nuts, and washers.

To provide customers with highly value-added products, Ray Fu has acquired certification of CE DIN EN14592, DIN EN14566, ISO9001, ISO14001, and ISO/TS16949. Moreover, our laboratory is accredited by the Taiwan Accreditation Foundation (TAF) for CE DIN EN 14566 standards. Ray Fu believes that through constant pursuit for excellence and continuous improvement on our services and products are the keys to succeed in meeting the world-caliber standards.

SHEH KAI Precision Co., Ltd., founded in 1992, is the largest manufacturer of bi-metal screws and screw anchors in Taiwan. As a leading supplier in bi-metal fastener industry, we can be your best strategic partner for top quality products.

Our manufacturing technique is unique and the knowledge is kept exclusively by Sheh Kai. Being ISO9001:2015, ISO14001:2015 (CNS 14001) certified, our research and development team and the highly committed management board

always strives for continuous innovation and improvement in providing better quality and higher value-added products.

Other than the high quality screw anchor, Shek Kai still continues to

develop new products. In Taiwan, Sheh Kai has been the first developer capable of producing welded drill bit in 2016 and screw rebar in 2017. Now, Sheh Kai also takes the lead in the world in these product categories. Our drill bit is as top quality as German and Japanese products while featuring even longer service life span. Our idea of screw rebar has pioneered the industry and acquired patent in Germany, Japan, and Taiwan. These innovations will massively shorten work-time required. www.shehkai.com.tw

UNIPACK is a leading manufacturer and exporter of packaging systems and automatic logistic systems. We provide customized machines to all clients and aim for time-saving, labor-saving, and increased-productivity as our main pursuit on our products. Unipack integrates our exclusive and patented features into machines and applies with PLC control and human-machine interface, making the machine more human and reliable. With Unipack's highly experienced and professional skills, our machines not only sell in the domestic market but they have been exported to worldwide markets.

Unipack's main products: auto box/ carton/ plastic bag/ KLT packaging system/ whole plant logistic systems/ automatic warehouse system.

Booth No. **B2247**

SCREWTECH is a leading manufacturer for specially threaded fasteners and pins with aim to supply automotive, electronics, and high-tech partners with the highest quality fasteners. Our production facilities are located in both Taiwan and China and continue on developing in-depth research and development to meet strict customer demands and deadlines. ScrewTech's production ranges from the manufacture of simple parts to a wide variety of finished precision screws, screw assemblies, machined parts and springs according to client requirements. And our manufacturing is ISO 9001:2008 certified and ISO/TS 16949:2009 certified

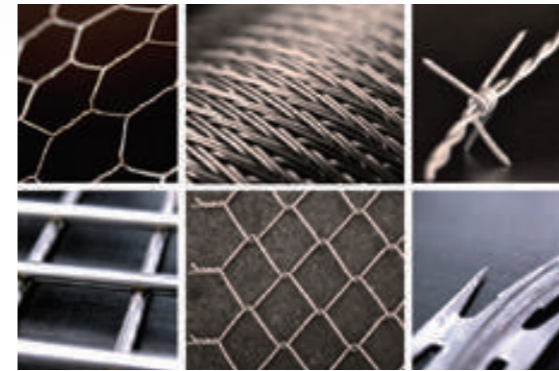

Booth No. **B2130**

YUANG HSIAN is one of the largest copper alloy wire & rod manufacturers in Taiwan. The mother wires are all produced with upcast technology, which are excellent for cold heading in fastener and electronic industries. Also, Yuang Hsian supplies rods suitable for electronic, hardware, and environmental protection applications. The product series include low-lead and lead-free products, which responds to the specific RoHS demand from Europe & Japan.

Our main products include brass wire, silicon bronze wire, nickel silver wire, phosphor bronze wire, free cutting brass rod, soudronic can welding wire, rohs brass wire & rod, EDM wire & copper anode. All the wire sizes range from 0.10 to 12 mm.

CHUN YU Works & Co., Ltd. is the leading company in fastener industry with over 65 years of manufacturing experiences in Taiwan. "Serving Society with the Best Quality" has always been Chun Yu's main objective. Our total quality control system surveils throughout the whole production process from raw materials to finished products. Furthermore, Chun Yu has been certified by IATF 16949, IRIS, ISO 14001 & 9001, AS9100, OHSAS 18001 & TOSHMS and CE-MARKING for EN15048, EN14399, EN13918, EN14566, EN14592. Our technical team with strong technique knowledge and experiences and the accredited A2LA laboratory with precision equipment allow us to fully maintain high standards on our total quality control system and be certified worldwide.

Our principal products are bolt, screw, nut, collated screw, autofeed

screwdriver and annealing wire, which we supply to automotive, building, steel construction, railway, and green energy industry.

Chun Yu is highly confident to serve you with offering our best services, high quality and competitive products. After all, Chun Yu always believes that a successful control in providing stable and superior quality products will generate mutual successes for both our customers and Chun Yu in a long-term cooperation.

machines. Our development in providing both finished products and machinery might sound as a challenging process, but Junen has accomplished great results. The irreplaceable know-how production we have acquired as a metal mesh fabricator has reflected on Junen's

JAR HON Machinery Co., Ltd. is a specialized designer and manufacturer of tapping machine, drilling machine, and various SPM. Also, Jar Hon is able to customize machines for any industry that require fasteners, automotive & motorbike parts, wheel nuts & special nuts, anchors and secondary processing.

Jar Hon's Machines adhere to our "Keeping Quality" and "Doing Better". Currently, our sales distributions are 30% from Taiwan and 70% from foreign countries. With facing the globally increasing labor cost, Jar Hon has equipped our machines with automatic feeding system, which offers one-man operation over multiple machines with simultaneous control in order to save labor cost for you.

For pre-sale services, Jar Hon always actively discuss with our customers to fully understand and satisfy customers' need. As for after-sale services, Jar Hon also offers comprehensive repair solutions as well.

Booth No. **D2349**

SAN SHING With a strong fastener manufacturing background, San Shing's tooling factory has developed to become a global tooling supplier. Being active in the fastener production sector in the past 50 years, San Shing served its customers with established tooling production technique. Product range includes tooling for cold forming, hot forging, press production and task-specific parts applications in industries ranging from the standard fastener industry and automotive industry to aerospace.

The factory is fully equipped with a total of 360 sets of processing equipment including for CNC milling, CNC turning, grinding, EDM wire cutting and EDM discharge. San Shing also incorporates 5-axis and 9-axis machining centers from Mazak Japan in order to keep up

with the latest machining advancement. Inside the factory, 350 staffs work in two shifts to supply up to 5,000 pieces of dies and 15,000 pieces of punches every month.

Continuous improvement is one of the core elements that underpin the growth of San Shing's tooling factory. To cope with the growing demand from our customers, a tooling factory expansion was completed in May 2015. This new expansion has allowed San Shing to acquire up to 6,000 square

meters, with machinery renewal and procurement also being part of the expansion plan. These represent not only the acquisition of extra space but also the further increase on overall productivity, efficiency, and production capability.

With the new addition of facility, equipment, and manpower, San Shing will be able to take on the increasing tooling demands from customers in various industries.

YNG TRAN has more than 20 years of professional rivet and press die manufacture experiences. The rivet we make also supplies to automotive industry.

Here is a brief information on introducing our rivet products.

- ⊙ Close-end rivet: The end of the tubular portion is closed; often being used in electric or electronics applications to prevent liquid or gas through the connection.
- ⊙ Multi-grip rivet: Multi-grip rivets are highly versatile and pull through a greater range of material thicknesses compared to standard rivets, and its extended grip range capacity helps reduce inventory required.
- ⊙ Outerlock structural rivet: This structural rivet has high shear and

tensile strength and its stem is mechanically locked into body. With complete hole fill and sealing capability, it can expand radially even during setting to fill an elliptical hole.

- ⊙ Interlock structural rivet: It is a structural rivet with an internal locking feature.

With excellent hole fill via radially expanded body, this provides greater joint integrity, added water resistance, and even compensates for irregular, oversized, slotted or misaligned holes. This type of rivet can also stop sheet movement in non-standard holes

- ⊙ Tri-fold blind rivet: It has three folded legs that distribute the fastener's clamp-load over a larger blind side head formation. The

larger blind side offers increased pull-through resistance in soft and ductile material applications. Tri fold rivets are used in automotive applications such as plastic body panels, trim, and interior components.

PEI SHEN was founded in 2014 and located at peaceful town in the middle of Taiwan. Our main products include drilling screw forming machine & mechanical parts.

Our new type of transmission is designed with cross holding pin-jointed structure toward the eccentric shaft for reducing the actuating arm runout, making the machine more stable during operation. This also offers good machine orientation and strength, which in return delivers a more stable quality of fasteners and extends the service life of the transmission structure.

This machine can be easily operated through a human-machine interface and available to present information in text, numbers and graphics on the monitor. It can deliver information on the machine condition, working progress, trouble alert and much other information, which is also suitable to incorporate with Industrial 4.0 software.

ZONBIX With over 30 years of experience in serving hundreds of clients from Europe and USA, Zonbix has earned the trust from our partners on our quality production and outstanding service. Among various types of fasteners supplied by Zonbix, the Eye-bolt series is one of the most popular product series with high diversity and outstanding quality.

The Eye-bolt series is precisely engineered in all parts to meet the

TOP SCREW Metal Crop. was found in 1975 in Taiwan and has been specialized in forging & turning parts. Top Screw has strong R&D team and is very keen to work for more interactively to design and manufacture special fasteners according customer's request.

E-self driving nut is one of Top Screw's inventions which can be widely used in public facility, furniture, and construction fields. E-self driving nut features round body with fans on it. The fangs cut into application tightly after the installation with screw. It can prevent anyone with intent to disassemble or pull it out when it's installed with security type male screw. This labor-saving design will assist workers install the but easy and fast. It can be installed on plastic, soft metal, and wood, and the nut material can be in steel, stainless steel, or alloy steel.

YOUR CHOICE Fasteners & Tools Co., Ltd. has devoted itself for 25 years in fastener industry as a real manufacturer. In Your Choice's own factory, now we supply screws, accessory tools, equipments and machines to worldwide customers. To deal with the increasing business, we added new factory and warehouse. To pursuit better quality control and production feasibility, we procured new production machines.

Your Choice provides both standard products and customized products, and we continue to develop for better and more efficient manufacturing process. Your Choice's quality product has been certified for ISO-9001 standards since February 2002, and as well as the 2015 version in May 2016.

Fasteners that are made with light and advanced materials are interesting topics for future applications, where Your Choice has spent great effort in this field on research and successfully developed our new products. Now, we are confident to introduce you our new long-time corrosion resistant solution.

required dimensions and the head is perfectly centered on the stem. Through Zonbix mature cold-forging technique, it delivers much smoother head arc and shape. Also, each product is tested prior to the dispatch and through an advanced and standardized quality controlling procedure to prevent any kind of manufacturing defects.

Zonbix also supplies various

DIN standard parts, and specialty/customized products.

ACCUVISION is based in Hsinchu Science Park in Taiwan, with specialized services in designing and manufacturing of automatic optical inspection (AOI) machines with self-developed software. Our AOI machines have taken the lead in the industry with acquiring several patents and constantly being purchased and used by worldwide well-know fastener makers.

We have a fully functional R&D team that keeps on developing new AOI technology in the field of both software and hardware. And the team is also working on Eddy current inspection for providing a more valuable and efficient inspection machine.

Both the software and hardware of Accuvision's self-developed eddy current were self-designed by Accuvision's R&D team, and we co-work with our US partner for the inspection probes for highly sensitive and sorting ability. Our eddy current module design can be combined into the optical inspection machines and become one complete machine, which brings out a more valuable and efficient inspection machine for customer to save more on their time and cost.

Accuvision offers not just high quality machines and customized services, but we make sure to always take the lead in the auto inspection field in moving toward the industry 4.0 smart manufacturing era.

TAIWAN SHAN YIN has a high R&D and innovation capabilities and supply a full-range of products, especially for high-end customized products. At Taiwan Shan Yin, we always provide "customer-oriented" services.

Our patented "X'TRA" screw has ETA certification. Its penetration performance is 20%-30% higher than other similar brand models, and its pull-out performance also has shows better results with 10%~20% better than others. As the result, this helps

Booth No. **A2343a**

save the time and the manpower in manufacturing process.

Also, the good penetration of the patented screw do not need pre-drilling in most applications, which even applies to using on the edges of premium hardwood and ensures completely no crack on the hardwood surface. The X'TRA patented screw is made with high quality materials that delivers stable and high performance even for application under a tough outdoor environment. The X'TRA patented screw is now under process for ETA certification (European Technical Approval) and expects to be certified in early 2018. Nonetheless, the X'TRA is already a highly popular product among European and the United States customers, proving it is a great cost-effective product.

JET FAST Company Ltd. was founded in 1979 in Kaohsiung Taiwan and is specialized in manufacturing rubber nut-insert, metal rivet nut and nylon nut-insert with more than 450 different sizes. Our products are mainly used in automotive industry and DIY markets for architecture in Europe and North America.

Rubber nut-insert: Function as a threaded insert and fastener to effectively seal against air or liquid leakage at the assembled joint. Rubber nut-insert works well for reducing vibration and absorbing the shock and noises. It is an ideal fastener for automotive assembling.

Metal rivet nut: Maintenance-free and the alternative choice from welding, tapping, or conventional nut+bolt.

Nylon nut-insert: Reusable and applicable on metal, fiberglass and plastic panels.

Our goal is to provide our customers with ISO / TS16949 certified professional and speedy services and our inventory in the warehouse. Also, the product dimensions can be customized according to customers' needs.

KCS Enterprise Company Limited is the top manufacturers for Bonded Washer® with high devotion in research & design on developing rubber-related products. Currently, our main products include Bonded Washer® and customized rubber products.

By bonding EPDM with steel sheet washer, it creates our KCS's main product such as the

bonded washer®. This product delivers benefits from combining rubber and metal materials like galvanized steel plate, aluminum, or stainless steel and surpasses other metal or rubber washers no matter in weather resistance, ozone resistance, heat resistance, slip resistance, leak resistance... and so on. This has become a new direction and a mainstream

product with enjoying an increasing market. Bonded Washer® is suitable for the building construction and automotive industry. In addition, the high-level products like M-type are also available for wooden cabins and villas.

MAO CHUAN The company has examined all the quality requirements, including TS-16949/APQP/FEMA/QSA, in producing our new locking plier structure. Mao Chuan also have obtained patents from Germany, Taiwan and China. This product sets apart from traditional locking plier function. The combination of designs from plumbing combination pliers and slip-joint pliers bring a collaborated advantage to this new locking plier with stronger mechanical strength and more variety in functions as a professional-grade hand tools that requires high durability and stability. Mao Chuan's new locking plier is light weight and offers good grip, one-hand control, and only small re-bounce occurs when the jaw is being unlocked; additionally, it is easy to control and highly safe to use. The quick adjustment of the elastic part resetting on the jaw opening mechanism further enhances the convenience of using Mao Chuan's locking plier; Coupled with high-strength mechanical structure.

Mao Chuan's new locking plier is without doubt meeting the multiple needs from professional and DIY users, where the users no longer have to make additional and multiple purchases for similar pliers.

JERN YAO At this year's Taiwan International Fastener Show, Jern Yao will display an improved version of bolt parts forming machine, JBP-13B6S. On this new machine, it will be equipped with:

- 1) Improved linear feed mechanism: no need to use stopper and the accurate wire clamping and designs can dramatically increase mechanism's working stability
- 2) Improved oil separation system: preventing cooling oil and lubricant oil from mixing. This results in longer mechanism service life
- 3) Improved transfer transmission

mechanism: by enhancing on production precision, the mechanisms' tolerance can be significantly reduced. Added with a improved consumable parts' design, this delivers a significantly improved mechanisms' working stability and continuous alignment

BIING FENG Since 1976, Biing Feng had been devoted to the R&D, manufacturing, and sales of cold forged nut/part formers. We offer a complete range of forming machines so that our customers can do one-stop purchase for all they need. Our forming machines are all made in excellent quality, stable and easy to operate, and offered with competitive prices. Other than our excellent machines, our customers can also obtain quick-respond services from our specialist team for assisting in solving machine problems. Biing Feng is determined to offer forming machines of best quality to the global market.

MASTERPIECE Hardware has been dedicated to good quality fastener manufacturing and exporting with thorough services for more than 30 years. The products we offer include deck screws, chipboard screws, self-drilling screws, drywall screws, washers, and clips. All our products are compliant with IFI, ANSI, BS and DIN standards, and the products can be customized based on your requirements and different packaging options are available for customers. As a professional manufacturer and exporter, we also applied ISO9001, CE certificates of EN14566, EN14592 & ETA.

Now, we have developed brand new deck screws. Our deck screws feature countersunk head that delivers a smooth finish on the materials after the screw is installed.

The ribs of the deck screws can tighten the screws firmly. The serrated threads on the deck screws cut wood fiber extremely well while the high-low threads of the deck screws increase pullout resistance. The thread cutting design at second to third thread also ensures no wobbling while drilling the screw.
