Bringing Dazzling Opportunities for Lighting Industry

開拓照明璀璨新契機

The 2019 TAIWAN INT'L LIGHTING SHOW(TILS) is organized by the Bureau of Foreign Trade and implemented by the Taiwan External Trade Development Council (TAITRA) and Taiwan Lighting Fixture Export Association (TLFEA). The spectacular show will be held May 8-10, 2019 at Taipei Nangang Exhibition Center, Hall 1. As the only one B2B lighting industry platform in Taiwan, the show is themed around the General Lighting Zone, Special Lighting Zone, Lighting Design Zone, Theme Pavilions and Testing & Inspection Equipment Zone, which gather upstream to downstream manufacturers. By visiting the show, visitors are able to get the trends of complete supply chain.

Looking back at a Decade of Advancements

2019 brings the 10th TILS. The show has witnessed the dramatic changes in the lighting industry during the past 10

years, and the evolution of traditional lighting in terms of color, wattage and color temperature. The major advancement has been in costly but longer-lasting LED products. However, with the maturation of LED production technology, mass production at economies of scale has led to a sharp drop in profits. In seeking higher profits, manufacturers have focused on special lighting and niche markets. Different from 2018's TILS, which integrates both LED manufacturers and interior design applications. This year, 2019 TILS focuses on 'Smart Design, Radiant Life,' assembling lighting application solutions and innovative technologies.

Comprehensive Solutions Smart Is the Origin

Among the Lighting in special fields such as museums, food, horticulture, medicine, fishing, and harbor lighting. Smart lighting draws the attention most. The most important thing in

The forums are highly popular.
論壇現場獲熱烈反應，座無虛席。

smart lighting is ergonomic lighting. Ergonomic lighting focuses on humans' needs by creating lighting systems based on visual, circadian, physiological, and psychological factors. However, differences in region, ethnicity, age, and physical condition all affect humans' requirements. Thus, the research of ergonomic lighting is still in early stages, and more rigorous analyses are required to turn the concept into products. Whereas, current technologies can meet users' ideal lighting environments, Beautiful Light Technology Corporation, one of the exhibitors, has developed an app-controlled smart home system. With one touch, users can adjust brightness, color temperature, and the preferred atmosphere. Team Young, another exhibitor, focuses on smart power control systems to integrate 2000 power switches into one remote control. This can be applied in factories, commercial buildings, schools and more. On the basis of ergonomic, the product only requires installing equipment on the original wiring without re-wiring.

New Opportunities for Industry-Academic Cooperation and Cross-Industry Alliances

The Theme Pavilions, led by the Industrial Technology Research Institute (ITRI), will exhibit a range of OLED lighting technology and share application experiences in many domains such as cinemas, interior decor, automotive, and beauty. A special zone will be set up for the nine award-winning works from the 3rd Cross-Strait Lighting Design Award. Combining creative designs and actual production, industry and the academic are allied. During the exhibition, the conference, the Unlimited Radiance: Splendid Lighting Design Infinite Value Seminar, inviting lecturers to talk about trends in lighting design. Secutech will take place simultaneously at Nangang Exhibition Center, Hall 1, so expect opportunities for cross-industry integration!

由經濟部國際貿易局主辦、外貿協會與照明公會執行的「2019 年台灣國際照明科技展」，將於 2019 年 5 月 8 日至 10 日於台北南港展覽館一館華麗登場。身為臺灣唯一 B2B 的照明產業平台，依主題特色規劃「綜合照明區」、「特殊照明區」、「照明設計區」、「主題館」與「檢測與驗證區」，徵集了上中下游廠商，滿足參觀者了解供應鏈各階段產品的趨勢。

回顧十年的大躍進

2019 年為第十屆台灣國際照明科技展。照明展直接見證這 10 年內的照明產業的劇烈變動，歷經傳統照明僅針對演色、瓦數、色溫等進程；大躍進為費用高昂相對不易損耗的 LED 產品，而生產 LED 的技術漸趨成熟後，規模經濟下大量生產性價比高的產品致使利潤驟降。生產商為謀求更高利潤，紛紛將重心放在研發各式特殊性照明與開發利基市場。有別於 2018 年台灣國際照明科技展，整合 LED 各製程廠商與室內設計建材應用。今年展覽重新移回「智慧設計，光輝生活」，集結照明應用解決方案及創新技術的趨勢發表。

整合解決方案，智慧為構想源頭

各式特殊場域的照明如博物館照明、食品照明、植物照明、醫療照明、漁業照明與海運港口照明中，最受矚目的為「智慧照明」。又以「人因照明」最受矚目。以人的需求為中心，根據生理、心理的感受以建立符合視覺感受與生理節律之照明系統。然而不同的區域、人種、年齡和身體狀況之差異皆影響使用者對光環境變化的要求，故此尚在研究階段，需要更嚴謹的研究分析才能將此技術產品化。目前可透過使用者主觀控制達到其想要的照明氛圍。本屆展商「麗光科技」，開發透過 APP 操作的智慧家居監控與居家系統，APP 一鍵調整亮度、色溫，還可依使用者偏好手動設置場景。另一展商「天揚科技」則主打智慧電源控制系統，整合 2000 個電源開關於一支遙控器上，可實際應用於工廠、商辦大樓、學校等場域，僅需加裝設備在原有線路，而不需重新佈線，在在都是以使用者為便的設計巧思。

產學交流與異業合作的新契機

以工研院為首之主題館，將完整展示 OLED 的照明技術，並進一步分享已應用的於電影院、室內裝飾照明、車燈及美妝等場域的經驗，主辦單位更特設「第三屆海峽兩岸照明設計大賽」9 件得獎作品專區讓天馬行空的設計，與實際生產的技術，能相輔相成，產學接軌。展期間規劃「璀璨無限：揮灑照明設計無限價值研討會」，特邀講師講述照明設計的趨勢。「台北國際安全科技應用博覽會」(Secutech) 也會於南港一館同期展出，期盼跨界整合的契機！

MEAN WELL ENTERPRISES CO., LTD.
明緯企業股份有限公司

According to a report published by Micro Technology Consultant in March 2018, MEAN WELL ranks 3rd among global power supply (DC output) makers. In contrast to the top two manufacturers whose main revenues are primarily generated by their ODM/OEM operations, over 99% of MEAN WELL's sales revenues come from standard power supply products sold under its own brand name.

In line with the rising use of LED lighting fixtures, MEAN WELL has released the mini waterproof LED driver power supply, the latest model in the XLG series which conforms to international lighting standards and covers a range from 25W to 240W. This product can be used with all kinds of LED bay lights, streetlights, horticulture lighting products, and floodlights. The XLG series products support constant current and power supply. This provides the highest level of convenience to clients and maximizes compatibility in model integration, which greatly simplifies driver power supply selection and reduces storage requirements.

根據 Micro Technology Consultant 於 2018 年 3 月報告，在全球電源供應器 (DC 輸出) 製造商排名中，明緯名列第三，有別於前二名電源廠大多以 ODM/OEM 為主要營收來源，明緯 99% 營收來自標準電源，是以自有品牌 -MEAN WELL 為主要經營策略的電源廠商。

明緯針對 LED 照明燈具應用，正式推出新一代終極版符合最新國際燈具規範標準，小型化防水驅動電源 -XLG 系列，產品涵蓋 25W 至 240W；可完整搭配各種 LED 天井燈、路燈、植物燈及投射燈等燈具應用；分別採用恆流與恆功率設計，方便客戶在燈具設計時可最大化的整合選用機型的共通性，大幅降低驅動電源的機型選用與庫存備貨的壓力。
