#### Head North & Scale Expanding

The Taiwan International Fisheries & Seafood Show (TIFSS), Taiwan's only B2B platform for the fishing industry, will move to the Taipei Nangang Exhibition Center, Hall 1, December 3 ~ 5, 2020. The northbound of the 6<sup>th</sup> edition of TIFSS this year, is expected to expand scale and serve more exhibitors and buyers, securing TIFSS as a major hub for the fisheries industry.

#### Showcasing four major areas "Fishing, Aquaculture, Seafood, and Fishing Tackle", covering industry from Top to Bottom

The show includes areas such as "Fishing Equipment & Technology," "Aquaculture," "Seafood & Value-added Seafood," "Seafood Process," and "Marine Biotechnology," covering the industry from top to bottom.

#### Taiwan has strengths in these four major areas:

##### Fishing

- ✓ Taiwan's offshore fishery has an annual output value of more than USD 13billion ranking among one of the top three in the world. Among them, the scale of the tuna longline fishing ranks first in the world, and the fishing grounds spread throughout the three major oceans of the world.
- ✓ Taiwan actively applies smart technology to marine fisheries to sustain industrial operations.

##### Aquaculture

- ✓ For aquacultural sustainability, Taiwanese business opportunities of innovative aquaculture technology are emerging, including smart monitoring, precision breeding and production technology, smart water circulation systems, and sensor technology. In addition, Taiwanese products with flourishing technologies such as Artificial Intelligence and the Internet of Things are highly competitive in this market.

##### Seafood

- ✓ As the world focuses on food safety and environmental protection, Taiwanese government and NGOs are committed to integrating aquaculture and traceability systems with HACCP, ISO, and EU certifications to ensure the safety of seafood products. Thus more business opportunities arise.

##### Fishing Tackles

- ✓ Taiwan is an angler's paradise with its pleasant climate, coastline, rivers, lakes and reservoirs, all of which are suited to different types of fishing and lay a solid foundation of tackle industry, with the government continuing to expand legal fishery areas.

#### Comprehensive Media Campaign to Capture Visitors' Attention

TAITRA will invite buyers from 63 overseas branches. Through various marketing channels such as online and offline sales before the event, invitations to internationally renowned media, one-on-one procurement meetings, and media interviews during the show, the exhibitors' turnover rate and international visibility are expected to be increased.

#### Reasons You Can't Miss out on TIFSS 2020

##### The one-and-only fishery trade show first held in northern Taiwan

Taiwan has one of the largest fishing industries in the world. As the only international fishery show in Taiwan, we will show you the charm of the "fishing kingdom". Also, for the first time moving northbound, we bring together all exhibitors and buyers across the island. By participating in Taiwan's only international show tailor-made for the fishery industry, you'll benefit from plentiful business opportunities.

##### Concurrently held with Taiwan Smart Agriweek with greater synergy

Agriculture and fishery have joined to reach out the global market. TIFSS will concurrently take place along with Taiwan Smart Agriweek hosted by My Exhibition Co. at the same venue, linking the industry, government units, educators, researchers alike in agriculture, fisheries, animal husbandry and poultry to provide comprehensive solutions for the agriculture and fishery market.

##### First International Seminar in collaboration with National Taiwan Ocean University

The world-renowned aquaculture media, AQUAFEED UK, and the National Taiwan Ocean University will cooperate with TIFSS for the first international seminar on marine fish breeding techniques. Industry professionals will share the latest techniques and experiences. It is expected to attract nearly 300 attendees.
