(ATI) ACTION TRADING INT'L LTD.

港商曄欣股份有限公司台灣分公司

www.cycledesign.tw

ATI is a technical oriented trading company, We have a very strong ATI team to serve our customers, The staffs of ATI are all very specialized and long term experienced in bicycle industry. We offer customers the New Products Information, Product Development & Technical Assistance, Sourcing & Negotiation, Building Vendor Relationship, Quality Assurance and Consolidation. With over two decades of Experience working with industry-leading clients, ATI understands the importance of prompt, accurate and reliable service. We also have an office in Shenzhen, China at this moment, together with the qualified local engineers with English communication ability, We also can serve our customers from China easily.

Floor Pump

- BARREL: STEEL
- HANDLE: REINFORCED COMPOSITE
- BASE: STEEL INLAID RUBBER PADS
- 3" PRESSURE GAUGE
- CLEVER VALVE WITH THUMB-LOCK LEVER
- 2-TONE COMPOSITE MATRIX HANDLE
- MAX.180 PSI

U-LOCK

- NEW DESIGN OUTLOOK
- 12MM STEEL SHACKLE TO RESIST HAND TOOLS
- EASY-TO-USE REVERSIBLE KEY
- ANTI-DUST COVER
- TWO SIDE DEAD BOLT
- MATERIAL: ZINC ALLOY/PLASTIC/STEEL/COPPER

MTB Pedals

- LARGE PLATFORM WITH GRIP AND FRICTION TO STRENGTHEN ANTI-SKID
- BODY MATERIAL: CNC-MACHINED 6061ALUMINUM
- AXLE TYPE: CNC-MACHINED CR-MO / SPINDLE 9/16 INCH
- BEARING: LIGHTWEIGHT SELF LUBRICATING (LSL) BUSHING/SEALED BEARING
- CLEAT: SINGLE-DIRECTION RELEASE INCLUDED
- SIZE: 103 MM x 96 MM
- WEIGHT: 362 G / SET

3D PRINTING TECHNOLOGY CO., LTD.

普立得科技有限公司

www.3dprinting.com.tw

3D PRINTING TECHNOLOGY CO., LTD. was established in 2004. It is the agent of Stratasys for 3D printing in the world and Smarttech3D for full-color 3D scanning in Taiwan. We focus on the promotion of industrial-grade 3D printing and reverse engineering of 3D scanning. Industry, customers cover aerospace, automotive, bicycle, medical, construction, education... and other fields.

Stratasys F370 (FDM) 3D Printer

- Easy to operate, dedicated to basic design and development projects, suitable for designers, engineers and educators.
- Engineering materials, from the most common ABS, economical PLA, anti-ultraviolet ASA, to PC-ABS.
- The equipment is stable and can print precise and consistent objects.
- Specialized printing software GrabCAD adjusts CAD files in Solidwork and simulates printing to optimize printing efficiency and quality.

Stratasys Fortus 450mc (FDM) 3D Printer

- Rapidly build high-precision, repetitive parts, jigs, fixtures, molds and other high-pressure manufacturing tools, as well as functional prototypes and end-use parts with tight tolerance testing.
- Various performance engineering plastic choices, in addition to the commonly used ABS-M30, high-performance industrial plastics such as nylon with toughness and ULTEM with excellent strength can be used.

Stratasys J55 Prime Full-Color 3D Printer

- Rotary printing platform, excellent surface finish and printing quality, suitable for industrial and mechanical design.
- Small size, safe and odorless, ultra-quiet, easy to use, suitable for office environment.
- More than 50,000 PANTONE certified colors and five printing materials simplify the design cycle and create full-color textured and realistic prototypes.

Booth # K0526

720 International Limited

飛達龍國際有限公司

www.720-armour.com

720 is an ultimate challenge in the world of extreme sports - Being able to rotate while being air-borne for 720 degrees.

Armour is a symbol of sturdy protective gear.

720armour

The fusion of these two concepts gives birth to the name 720armour, and our extremely serious sports eyewear.

Founded 1996 on the Sunshine Coast, Australia, 720 produces a range of streamline sports eyewear. 720 was acquired in 2002 by Hwa Meei Optical Group, an international supplier of professional eyewear. Since then, 720 has grown tremendously with its advanced technology and design, it is confident that it will become a leading brand to meet quality and fashion demands. In less than a decade, the brand is well known in most European countries, America, Asia and the Middle East.

Mars

The frame is constructed from French-made Arkema G850 (Bio-based Plastic), which reduces carbon emissions by more than 45% compared to traditional petrochemical-based plastic frames. BPA and BPS-free products promote a healthy environment and a sustainable earth.

1. CVS™: Compressed Venting System
2. ErgoGrip™: Adjustable nose pads
3. High Performance: Bioplastic frame with durable, flexible and shockproof, anti-slip design
4. MaxView™: Toric lens design, increases peripheral vision
5. Q'Lock™: Quick change lenses system
6. 720.me™: Personalized customization available
7. CRx™: Prescription customization available. Available in prescriptions of +2.00 ~6.50
8. HiColor™: Unprecedented Visual Experience.
 - Sharpness: Sharpened vision/Highlighted Vividness
 - Recognition: Color utilization.
 - Agility: Instant responsiveness.
 - Healthiness: UV / HEV420 Blocker.
 - Light regulator: Regulation of light at suitable amount.
 - Confidence: Upgraded concentration and acuity.

Ode

720 Zero & Ocean Upcycle Series:

The frame is made from recycled fishing nets (Recycled Nylon) reduces carbon emissions by 25% compared with traditional petrochemical-based virgin plastic processes, and reduces the impact of virgin plastics on global warming by up to 90%.

This product is packaged with FSC-certified packaging material and rPET (recycled PET) lens cleaning cloth in addition to a sustainable cotton and linen goggles bag.

Features:

1. Durable and Safer to wear
2. Frame/ Made from recycled Nylon
3. Lens/UV400 protection with impact resistant PC/PC Polarized lens
4. Screwless construction, durable & safer to wear
5. 720armour sunglasses can be tailored made into prescription sunglasses through 720CRx (Custom Rx) service.
6. Lightweight frame
7. Sustainable & Eco-friendly design

Flash

Bio-based plastic Arkema G850 significantly reduce the impact on the environment. This special compound material can increase the frame's durability in terms of color fading issue and strength. "We want to build a glasses has a longer lifespan, it can go with the customers for a period instead of a disposal, that's because we care about environment and brand sustainability

- 1.CVS™: Compressed Venting System
- 2.ErgoGrip™: Adjustable and non-slip rubber nose pads
- 3.High Performance: Bio-based plastic frame with durable, flexible and shockproof, anti-slip design
- 4.KIAO™ Tech: Versatile assembling for whole, half, rimless frame styles
- 5.MaxView™: Big cylindrical lens design, maximizes your field of view
- 6.Ultra AFP™: Resists fogging in aggressive conditions
- 7.Anti-Fog Protection and anti-scratch coating (Long-lasting anti-fog coating and mirror surface scratch protection)
- 8.HiColor™: Unprecedented Visual Experience.
 - Sharpness: Sharpened vision / Highlighted Vividness
 - Recognition: Color utilization.
 - Agility: Instant responsiveness.
 - Healthiness: UV / HEV420 Blocker.
 - Light regulator: Regulation of light at suitable amount.
 - Confidence: Upgraded concentration and acuity.

EG-1.0 Race

With a gravel bike frame geometry and a drop bar, METRONEER EG-1.0 Race is the best choice for riding with leisure and with style.

- Alloy frame + Carbon fork, Full bike internal cable routing
- FSA light weight double butted Gravel bar + SMR stem for internal cable routing
- 10 speeds derailleur system
- Mechanical DISC brake
- Light weight compact 36V250W rear drive hub motor + 420Wh in frame Lithium battery + LCD display
- Tubeless Ready double wall rims + Stainless spokes + 700*38C tires

EU-7.0

- Innovative tilting mechanism to the double front wheels to keep the trike balanced and stable while speedy rides
- Two batteries prepared for long-distance rides
- Adjustable stem to adapt to all types of riders
- One brake for the two front wheels which stops both simultaneously
- A parking brake for temporary stops while remaining in seated position
- A front carrier with a net strap keeping the cargos steady and secure
- Both mid drive and rear drive motor options available
- For larger carrier space, the "long-tail" EU-7.5 is recommended

Trike Expressor

Trike Expressor is specifically designed as a vehicle for delivery services.

- Riders can ride without the burden of carrying a delivery box on their backs
- Exclusive hub design allowing less tilting when changing directions
- Thermal delivery bag including both a freezer and a heater
- 3 models available: Mid. drive, Rear Drive and Moped

AIRSMITH CO., LTD.

梅翠斯實業有限公司

www.airsmith.com.tw

Airsmith produces metallic components for bicycles, and has become global best seller for many years. We have produced exquisite products, and are proud of the quality. We are famous for bicycle pumps, tools.....Whatever your need is, you always find the most suitable products in Airsmith shop. The equipments we provide, such as portable mini-pumps and volley 8, can barely be found in other shop. We have experience for this field, and extraordinary creativity, that's why we are special. Airsmith only has two target when it comes to manufacturing bicycle components, which are making every tool more easily-portable and better-functional.

Mini Pump AIRLIFT HPL-G

High pressure mini-pump is carry type.
The product is ergonomic designed, and easy to be used.
The product size is very small, and easy to carry.
It could be used for 7075-T6 Presta & Schrader valve.
Easy to read the pressure from in line pressure gauge.
The Max. pressure is 120psi.
The product is made by CNC aluminum alloy.
Very light weight with perfect design.
Nylon bracket with rubber bend strap.

Slam C02

One turning in valve system.
Air flow control.
7075-T6 2-in-1 Presta & Schrader valve.

Volley

Volley is 90 & 270 degree auto index.
The material is full hi strength SUS420 stainless steel.
The corrosion resistance tumble polished.
8 Bits: Hex 2.5 / 3 / 4 / 5 / 6 / T25 / T30 / PH1 cross drive
& Presta removable core tool

Arkietech Engineering Company

安吉特科技有限公司

www.arkietech.com

Arkietech specializes in high-strength alloy fabrication. Arkietech produces world-class stainless steel and aluminum alloys which emphasize in strength, durability, and lightness. Thanks to superior USA raw material plus with the help of robotic automation, Arkietech serves a wide variety of industries including bicycles, motorcycles, automobiles, sporting goods, wheelchairs, and medical goods.

KVA (MS3&MS1) Stainless Steel

MS3/MS1 Stainless Steel is an aeronautic-grade material that is resistant to corrosion and acidic abrasion. This product is specifically designed for the outdoor recreational industry and built to withstand the forces of Mother Nature. Outside diameter can range from 12.7 mm to 50.8 mm with a minimum wall thickness of 0.45 mm.

**Air Harden Velospec**

Velospec is a US made, seamless, air-hardened, high-strength steel alloy capable of withstanding pressures of up to 1200 MPa as well as possessing an elongation threshold of 15%. The high tensile strength and lightness make it ideal for high-end frame fabrication. Arkietech's seamless tubes undergo DOM manufacturing to produce more precise tube dimensions and sturdier grain structure. Due to the nature of air-hardening, this special alloy also has the ability to quickly solidify and thus strengthen TIG-welded zones during cool-down. Wall thickness can be customized to as thin as 0.7mm.

**Halo Ring (Capability of Welding Robot)**

Arkietech utilizes robots as well as highly-trained associates to ensure the precision and maximize the efficiency of fabricating Halo rings with a focus on strength and lightness.

AUCCURATECH AUTOMATION CO.,LTD

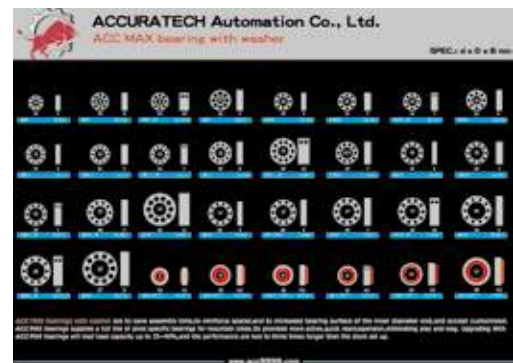

尚冠興貿易有限公司

<http://www.acc9999.com>

ACCURATECH AUTOMATION CO.,LTD. was established in 1991. has long been committed to the precision machining industry from the production of traditional machine tools. Now it has been steadily transformed into automatic / CNC lathes. Diversified production. We can integrate resources and provide a one-stop shop Purchasing services. Cooperate with customers with our advanced precision processing technology and professional skills. Carry out product development. Actively research and develop and expand domestic and international markets.

Full Complement Bearing

ACCURATECH full ball bearings provide a full range of bearings dedicated to mountain bikes. It is more active. Fast rear shock. And eliminates excessive swinging of the connecting rod. This bearing is 35-40% higher than normal bearings. Load capacity. And contains high-efficiency resistance Acid-base lubricating oil. Additional gaskets. ACCURATECH full ball bearings are more competitive. The price of the two separates is more competitive. It can also save assembly time. The assembly gap is strengthened. And the bearing surface at the inner diameter end is increased.

LINKAGE

ACCURATECH newly developed four-bar linkage products. Subverting the traditional use of four-bar linkage to become the front end of bicycle design. ACCURATECH R & D and design are integrated according to the size and type required. The design of bicycle models can save designers time for conception. Provide all crank components to achieve cost control of the entire set of cranks

BIKE CNC PARTS

Aluminum alloy is the most widely used non-ferrous metal structural material in industry. Because aluminum has good workability and high plasticity, products of different shapes or lengths can be manufactured according to different needs. In addition, aluminum alloy has good weight and cost advantages, Aluminum has excellent corrosion resistance. After various surface treatments (anode, polishing, sandblasting), the corrosion resistance is better. E-BIKE parts use aluminum alloy as one of the main principles

CHEMG SHIN RUBBER IND. CO., LTD

正新輪胎

<https://www.maxxis.com/int/>

MAXXIS' parent company, Cheng Shin Rubber Ind. Co., Ltd., was founded in Taiwan in 1967 as a manufacturer of bicycle tires. Eventually growing to become the largest manufacturer of tires for bicycle, ATV and motorcycle in the world, as it is today, the company expanded its reach to additional market segments including passenger, bicycle, light truck, motorcycle, ATV, lawn and garden, trailer, commercial truck and industrial. MAXXIS was introduced as a brand in the United States in 1992 and today employs more than 30,000 people around the world with more than USD \$4 billion annual revenues.

GRAVEL TIRE-RECEPTOR

Maxxis Receptor is a semi-slick gravel tire for riding on pavement, hard-packed dirt roads, and light gravel. The semi-slick design ensure the tire has low rolling resistance on the center diamond tread and the knobby design on the tire shoulders that provide great traction on light gravel use. The tire size comes with 650x47b and 700x40c with black and Tan wall options. Of course, not mentioning Tubeless Ready is also the must have SPEC on Maxxis Gravel tires.

**NEW SHORTY**

The original Maxxis Shorty was released back in 2014. And after several years of feedback and investigation. Maxxis decided to upgrade the Shorty to fulfill the riders' need.

After 2 years of development with top world cup DH & EWS riders, Maxxis finally comes out with the New Generation of Shorty. That would be in three parts of benefits: The Pattern upgrade, Mud Clearing ability and Size optimization. The tire compound comes up with 3C MaxxTerra on EXO for the trail ride and 3CMaxxGrip with Double Down and Downhill casing for Enduro and Downhill ride. Also, the SPECS come with Tubeless Ready available and the overall weight is still 5% lighter than the original Shorty.

**HIGH ROAD TANWALL**

Maxxis R&D team collaborating with World Tour team Israel-Premier Tech Nation starting from 2020, after countless test rides and stage races, resulting with the all-around, fast-rolling, and puncture resistance New High Road. In the second half of 2021, the tanwall version has been updated to offer wider product range, proving the New High Road excels in both performance and looks.

This concept has enabled us to produce products loved and trusted by cyclists.

SWD Carbon Road Disc Brake Wheelset

The best sale disc brake wheelset of CRODER, using AeroCurve™ technology as the SWD™ to produce greater aerodynamic performance in the rim design. The new carbon fiber material is used to make the wheels lighter and stiffness than comparable wheels on the market.

1. Rim Internal 21mm, best compatible with 25C/28C tubeless tires.
2. The SWD™ wheels have 2 profiles for SWD™ 4 (45mm) or SWD™ 6 (60mm).
3. Inside 6 pcs ceramic bearings, more smoothly.
4. 3 colors option, easy to match your bikes.
5. Simple design, super beautiful.

The SWD™ is built to endure, giving you the speed and confidence, it is always ready for your every cycling.

CRODER CRT-1 5-in-1 Disc Rotor Tool

CRODER 5 in 1 multi-function disc rotor tool is a good partner for you to take care of your disc brakes at home.

There has Five useful functions:

1. It can be used as a wrench to lock the cap in the center
2. It can measure the safest low thickness of the brake pad and disc rotor for different brands, so you will not miss the time to replace it.
3. You can correct and adjust the deflection of disc
4. You can press the piston away, so that you will feel better when you braking
5. 5mm small wrench, lock the caliper parts at any time

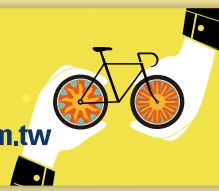

CRODER SPIRIT Modular Crankset

You can use the huge crank arm range (from 140~172.5mm) for cycling, and getting better cycling experience.

1. Modular Design, easy for changing each parts
2. Crank arm length: 140/145/150/155/160/167.5/165/170/172.5mm
3. 4-arm/5-arm BCD110mm, good compatibility
4. 24mm spindle
5. Fit with QUARQ power meter
6. Perfect Fit with CRODER GEARMATE Super Compact Chainrings

CHERN SHIANQ ENTERPRISE CO.,LTD.

宸項企業股份有限公司

<https://www.chernshianq.com/>

Established in 1989, Chern Shianq, a professional and experienced manufacturer provides OEM and ODM manufacturing services, mainly produces handlebar tapes, water bottles, bottle cages and motorcycle & bicycle grips...etc. All factory works are performed in accordance with ISO 9001 and BSCI standards.

In order to increase product added-value and company competitiveness, we utilizes our expertise in OEM technology and modern design concepts to develop multi-functional and ergonomically designed products that conform to lightweight and unique style.

Our goal is to achieve a high level of customer satisfaction and demonstrate customer needs to create a mutually beneficial relationship by standing our commitment to quality, efficiency and service.

Sport Water bottle

Item number: CSB-553PL

- Patent HEMX impact PP
 - Ergonomically designed in anti-slip 3D spiral shape.
 - High formability and squeeze without any sound
 - Eye-catching Transparent Black.
 - High Temperature Resistant of 90-100°C
 - Passed international authoritative test FDA and REACH.
- 100 % Made in Taiwan

Handlebar Tape

Our bar-tapes provide cushion and anti-slip functions by combining PU and EVA layer. The outer PU leather not only has great anti-slip function but also provides more choices for clients to design their own patterns. Moreover, we also produce punched bartapes. This bartape not only retains anti-slip function, but also bring great wicking ability. Also, for presenting client's logos, this product can be logo printed, debossed or lasered.

Silicone grips

- 100% Silicone
- Durable /flexible/anti-slip
- Multiple colors.
- High-temperature resistance/Easy clean

CHIA CHERNE INDUSTRY CO., LTD

佳承精工股份有限公司

<https://jagwire.com/>

We specialize in one thing, and we do it well.

Twenty-five years ago the Jagwire brand was born with the simple goal of providing the best shifting and braking systems for bicycle riders, dealers, and manufacturers. We're honored and humbled that our products have been so widely accepted in the industry for so many years and that our business continues to grow.

And while we're continuously focused on the future and developing the best assortment of bike products available, we want to take a few minutes to thank all of our partners and customers.

Innovative, collaborative, passionate people.

Pro LR2 Rotors

- Jagwire's Pro LR2 rotors are a stylish way to upgrade the performance and style on any disc-brake bike
- "J" wear indicator alerts when the rotor requires replacement
- 2-piece design features an aluminum spider that reduces rotating weight by roughly 15% compared to a traditional single-piece rotor
- The separate machined stainless steel braking surface resists corrosion while ensuring consistent stopping power and superior modulation
- Available for use with Center Lock or ISO 6-bolt hubs and are offered in four sizes from 140mm to 220mm

**Elite Cooling Disc Brake Pads**

- Jagwire Elite Cooling Disc Brake Pads provide the ultimate braking performance for the world's most demanding riders
- A three-piece construction process is used to effectively remove heat from the braking system, preventing brake fade and warped rotors in extreme conditions
- The lightweight aluminum backing plates have integrated cooling fins with top and side cutouts to maximize cooling
- The proprietary semi-metallic compound offers superior braking power and modulation that excels in all weather conditions
- A graphene thermal transfer plate sits between the compound and backing plate to pull heat away from the rotor and into the cooling fins

Pro Dropper DIY Cable Kits

Jagwire's Pro Dropper Kit is an easy way to upgrade the performance of any dropper seatpost and remote lever

- The included dropper-specific 0.8mm Pro Polished inner cable delivers effortless cable movement
- Innovative 3.0mm LEX-SL housing provides smooth bends, even with tight corners and internal routing
- All parts needed for a complete dropper seatpost cable and housing installation are included

CIRCLE ENGINEERING

圓科股份有限公司

<https://oneaer.com>

AER stands for “Advanced Engineering Reinforced”. This is our core philosophy we believe in to design and create our products. By using this firm attitude, we transform our brand energy into “ONE” of a kind industrial product.

DX3 wheels

Devouring Miles In Aero Form, Gaining Elevation With Invisible Wings. Ultra light weight disc tubeless ready road wheel for hill lovers. Light and responsive. Excellent stiffness and outstanding feather lightness make each pedal stroke like the elegant dance move on the pedal. A very light all rounder too.

- Set Weight: 1292g
- Hub: DT SWISS 240 EXP
- Brake: Disc
- Spoke: SAPIM CX-RAY
- Rim Height: 38 mm

RX5-SE wheels

Rim brake version of DX5. Cut through the air with extreme speed. Light weight tubeless ready road wheel for all rounders and high speed addicts. Light and responsive. Always pushing you to pursuit a higher speed.

The brake track of the RX series utilized unique surface treatment BCS (Braking Control Surface) on 4 sections, improving the braking stability with less stopping distance.

ONEAER carbon fiber specific brake pads are optimized for better drainage performance, not only offers more braking power, but also enhance the safety in wet condition.

- Set Weight: 1397g
- Hub: DT SWISS 180
- Brake: Rim
- Spoke: SAPIM CX-RAY
- Rim Height: 48 mm

DXT wheels

Super light weight deep profile wheel for ultimate aerodynamic benefit. Great weapon for high speed challenger and Triathlon enthusiast.

Maintaining the same level of light weight while increasing the rim profile to achieve higher level aero effect. Presenting the time/clock image by the unique surface treatment. A brand new product design consist of Distance and Time.

- Set Weight: 1477g
- Hub: DT SWISS 240 EXP
- Brake: Disc
- Spoke: SAPIM CX-Sprint
- Rim Height: 58 mm

Drivetrain Tech Solution Inc.

傳誠技研有限公司

<https://www.geardrivetech.com/>

DTS dedicates to promoting the innovative bike-drivetrain-system. There are two brands under DTS:

1. Geardrive: We supply the innovative 1x system and bring new concept into the conventional bicycle chain system. With the exclusive shifting design of Geardrive, you will have a more enjoyable and smoother experience during your journey.
2. CDRIVE: a belt drivetrain system, which provides a quieter and lighter riding experience.

Cassette

1. With wide ranges of speed (from 8 to 12) and gears, we provide multiple choices to customers, in order to meet variable demands of the market.
2. By reducing the difference between each sprocket, the tooth configuration is like a smooth stage which ensures the shifting performance smoother and more successful.
3. With the exclusive lower chain groove and the optimized upper chain groove, the unique flow controlled design assures the smoothness and the precision of gear shifting and also avoid the risk of pedaling slips.

Rear Derailleur

1. With the large tooth capacity, the maximum gear of the derailleur can support up to 50T.
2. The distinctive chain retention system decreases the risk of chain drop and also ensures the stability during gear shifting.

Belt Drivetrain System

1. Variety: We supply the different drivetrain system for kids' bikes, adult bikes, and E-bikes.
2. Customized services: We can provide the customized services including direct mount version front sprocket, and offset design according to hubs or frames to meet customer needs.
3. We use the Kevlar as our belt core wire to provide high-quality and cost-effective products.

EVERBLISS GREEN CO., LTD

恆暘股份有限公司

<https://everblissgreen.com>

The brand name "Everbliss Green" comes from the founder's vision for the future of human sustainability. With more than 30 years of experience in semiconductor equipment manufacturing, Everbliss Green is built on the basis of excellent, high speed, high precision, high quality, and automation, and in recent years has invested in an industrial design team and combined with professional manufacturing capabilities of cooperation partners to take green energy technology as the starting point.

Solar photovoltaic hard and soft backpack

- Features

Front: Super Sewing ABS + CIGS Flexible Solar Panel + EVA soft bottom shell

- Back

"Reflective strips" design on the straps, which are positioned on the chest when the backpack is carried, enhance safety.

Chest strap "magnetic quick release buckle" German buckle, fast opening and closing in seconds.

- "D-hook" on the strap for hanging objects at will.

"Molle Connection System" on the strap to mount accessories according to individual requirements.

- Comfortable back system "3 individually ventilated" mesh sponges on the back and shoulders for excellent coverage.

"Hidden zipped pocket" on the back for personal items such as valuables.

The "luggage strap" on the back allows the backpack to be attached to the luggage trolley, making it easier on the shoulders.

- Main storage space in the centre (180 degree opening main pocket)

"Convenient fasteners" on both sides and "3M heavy duty felt pads" on the bottom to prevent items from falling out directly when opening the backpack.

- Laptop compartment with 1.8L capacity for 15" laptops and 12" tablets. (L28 x W2 x H32.5cm)

"Front double pocket" for frequently used items and easy collection

"Zipper inside the vertical pocket" for keeping personal items out of sight.

For inquiries, please contact: sales@everblissgreen.com

Shark Solar Backpack

1. This backpack is a backpack that can be used for medium and long-distance travel. The exclusive appearance patent can obtain endless green energy during the day during long-distance outdoor travel. And there is a huge storage space in the backpack.
2. The surface of the backpack is covered with a layer of solar panels, which can be used to supply 3C supplies with DC power of 5 volts under sunlight.
3. The solar panels are made of flexible film panels, so the thin and light size covers the surface of the backpack, which can effectively protect consumers and slow down the impact of the solar panels when using the backpack.

*The shark backpack is placed flat and facing the full sun (no clouds or other shade of trees), which can increase the battery power of the mobile phone by 30% within an hour. If it is midday or summer, the charging efficiency will be higher.

SHARK SOLAR BACKPACK

5
COLORS

Folding Soft Solar Panel

1. Thin and light solar panels can be carried around. Climbers need to carry many items in long-term load-bearing walking. The solar shark backpack uses flexible thin-layer solar panels, which are lightweight, thin, waterproof, and durable. It is draped over the surface of the backpack, which effectively protects consumers from cushioning when carrying the backpack and avoids damaging the solar panel. Despite the adventures in nature, mountains, and forests, it can also provide an endless source of energy.

E-PR105ST FULL CONTACT ROAD PEDALS

A pedal built with quality materials. It features a strong, thermoplastic body, an abrasion guard, a Cr-Mo axle on a slimline dual bearing system, and a gauge makes precise binding tension adjustment easy.

- Abrasion guard
- Tension gauge

Interface: EPS-R (Compatible with Look Keo).

Body: Full contact, engineering thermoplastic.

Axle: Heat-treated, CNC-machined Cr-Mo (cartridge).

Bearings: LSL bushing & sealed.

Bindings: Fiberglass-reinforced thermoplastic, enclosed mechanism, tension adjustable with gauge.

Cleats: E-ARCR3H1

Size: 87 x 92 mm

Compatible with Exustar road shoes, other three bolt hole shoes.

E-PM242 CLIP-IN PEDALS

A pedal featuring an aluminum body, a Cr-Mo axle and slimline dual bearing system.

- Tension gauge

Interface: EPS-M (Compatible with Shimano SPD).

Body: Aluminum.

Axle: Heat-treated, CNC-machined Cr-Mo.

Bearings: LSL bushing & sealed.

Binding: Double-sided Cr-Mo, tension adjustable.

Cleats: E-C05F

Size: 89 x 91 mm

Compatible with Exustar two bolt shoes, other two bolt hole shoes.

E-SR21011 CARBON FIBER ROAD SHOES SHOES

Advanced level road race shoe. Engineered for maximum performance. It features a Smooth Form TPU upper with breathable mesh and dual rotary microlock closures. An extremely rigid, carbon fiber sole maximizes power transfer, while built-in Air Control vents help keep you cool, and rubber anti-slip walk pads are ready when your feet touch the ground.

- Smooth Form upper
- Dual rotary microlock closures
- Slimline carbon fiber sole
- Rubber walk pads

Upper: Hot melt TPU with breathable mesh, lightweight PEBAX heel counter.

Closure: Dual rotary microlock closures.

Sole: Carbon fiber with rubber walk pad. Air Control vents, cleat position indicator.

Insole: Ergonomic arch-design washable PU.

Interface: 3 bolt hole cleats.

Booth # N1220

Giatex Cycle Co., LTD.

佳得車業有限公司

<https://en.fit-bike.com/>

GIATEX FIX, can solve these problems by perfecting the user's ergonomics and riding style through the use of patented innovative and adjusting system. By adjusting our special designed sliding frame tube on Giatex 'FIT', the rider can change the wheel base, the level distance between the seat tube and the head tube as well as the angles of the front fork and the seat tube to seek for a new geometry to suit for his/her height so that a child or an adult can equally enjoy a smooth, comfortable and fun biking ride.

Giatex Adjustable stretching children bicycle

In market, the 12"/14"/16"/20" child bikes all have a one-size frame. However, as children grow and develop, their bikes need to be replaced again and again, resulting in the increase of expenditure and the burden of the environment. Especially for children 135cm-150cm tall, neither the child bikes or the adult ones fit them. GIATEX FIT stretchable design provides the best solution that allows children to adjust the length of the bike frame gradually with their growth, and help them maintain a proper riding posture. <https://en.fit-bike.com/>

Giatex Adjustable stretching bicycle

GIATEX FIT allows every user to customize the most suitable bike frame for himself/herself, and makes biking as easy as a breeze. Similar to people wearing a pair of well-fitted shoes that makes walking quite comfortable and enjoyable, riders would have a good time during each riding tour.

Long-distance riding will inevitably lead to muscle soreness and spasms. Riders may freely fine tune the top tube on Giatex FIT to alter their riding posture, which will also change the stress point of muscle nerve, making a long-distance riding tour more comfortable. <https://en.fit-bike.com/>

Giatex Adjustable stretching electric bicycle

Combined with the frame, the GIATEX FIT electric assisted bicycle's battery is placed in the telescopic inner tube. This integrated design makes the bike's appearance become more concise, just like a normal one.

The telescopic inner tube, containing the lithium battery, is itself a battery box, which is waterproof, anti-theft, and explosion-proof. The battery box is also GIATEX FIT's structural component of the down tube.

According to the capacity of lithium battery, there are different sizes of frame tubes, which are lightweight urban, standard, and heavy-duty types. Therefore, GIATEX FIT can meet and satisfy different consumer's needs. <https://en.fit-bike.com/>

Gomier Manufacturing Co., Ltd

<https://www.gomier.com.tw/>

GOMIER MFG.CO.,LTD was founded in 1986-1987 and gradually grow into one of the leading manufacturer in Taiwan. We specialized in tricycle and various special needs bike/tricycle. We provide not only customized products but also ODM service to a lot of well-known brand across the world base on our exclusive knowledge. To meet the growing demand of tricycle market, GOMIER started scheme to expand our factory in 2006 and finished by 2007. In recent years, our R&D department introduced Dynamic Fatigue testing machine and treats every products with European Standards (EN) Test Methods to ensure the strength and quality to our customers. We were awarded with the quality management system ISO9001, and ISO13485 quality assurance certification in 2011. GOMIER care and respond to inclusive groups, that is why we started developing Therapy Tricycle. The therapy Tricycle collection offer cycling to customer with special needs, which included both hand cycle and normal pedal tricycle, rider ranges from 3 years old kids to adult. Our approach is to provide user friendly product and the best service for each distinction and buyers. This makes GOMIER the quality and durability company that you can rely on.

TR-716E

TR-716E is a durable commuting tricycle, which could load up to 200 kg, the rider included. The design of the frame is composed of the combination of the triangular structure which is more durable and yet lighter than any other standard tricycle. The cargo box is made from maple veneer with exceptional craftsmanship, lighter and stronger. With TR-716E, you can ride with style at anywhere and anytime.

- LxWxH 2140 x 850 x 1110mm
- Frame Alu. / Steel
- Drivetrain 38T / 9s 11-36T
- Brake Hydra. DiskBrake*2 / Hydra. DiskBrake
- WheelSet 20" * 2 / R: 26"
- MaxLoad Rider 100kg, Cargo 100kg
- Motor Bafang M420 36V 250W
- Battery 36V 14.7Ah
- Distance 50Km

TR-6000E

TR-6000E is made of aluminum and powered by an electric motor. No matter pavement goes uphill or you have to pedal a long way home, Tr-6000E is your best choice.

The design of TR-6000E is simple and full of post-modern style. The lower seat stays give greater space for your cargo and can be adapt to different goods with various shapes. The tricycle is the perfect match for the startup.

- LxWxH 1820 x 780 x 420(CT)mm
- Frame Alu. / Steel
- Drivetrain 38T / 6S 18-28T
- Brake Disk Brake / Disk Brake
- WheelSet 24" / R: 24" * 2
- MaxLoad 100kg (Rider included)
- Motor Bafang M300 36V 250W
- Battery 36V 15.6Ah
- Distance 50Km

TR-3100E

TR-3100E is one of the most powerful and strongest heavy-duty industrial trikes, which can load up to 300kg and still move easily. The alloy frame, steel rear unit, and the 100x100cm platform are stiff and practical. Along with a Bafang G510 mid-drive motor, which can provide 750W. It's Perfect for extremely heavy-duty transportation.

- LxWxH 2420 x 1740 x 460(CT)mm
- Frame/Fork Alu. / Steel
- Drivetrain 32T / 22T
- Brake Disk Brake / Disk Brake
- WheelSet 24" / 16" * 2 (Motorcycle Rim)
- MaxLoad 300kg (Rider included)
- Motor Bafang G510 48V 750W
- Battery 48V 14.4Ah
- Distance 25Km

GREAT GO CYCLES INC.

偉兒達工業股份有限公司

www.trigonbike.com

TRIGON is not just a brand, we make our own bikes. We aim to make bikes, that provide the best riding experience to cyclists. Ride with TRIGON, become one with your bikes.

AR01

1. The ultimate all-rounder.
2. Full Integration with BLKTEC x TOKEN Cable Box system.
3. Geometry for the racers and masses, who want to go fast in comfort.
4. Vortex-Tubing Technology (VTT), TRIGON patented technology and wind tunnel testing, achieved a drag reduction of 19% (saving of 32 watts) (Compare with HC01-D).
5. the perfect combination of Aero, stiffness, and lightweight.
6. Carbon Aero-Cover, enjoy the power of disc brakes with an aero advantage.

HC01-DR

1. The hill climber's philosophy in reality.
2. The balance between stiffness and weight.
3. A shorter barrel-shape head tube and straight fork design provides great stiffness and handling experience.
4. A bullet-like seat tube and seat post design focuses on aerodynamics, as well as the rear triangle drop position, combining the unique bb shape (an idea taken from a fighter jet), slicing through the wind perfectly.
5. Short but wide pebble-shaped down tube prioritizes rigidity, guarantees excellent power transfer.

GV01

1. The perfect bicycle for adventurers.
2. The uniquely shaped tubes help maintain stiffness, providing exceptional handling and control.
3. 700C road tires or MTB 650B*2.1 compatible
4. Special fork and rear triangle shape and the confidential carbon fiber layup design, absorbing vibration from the wheel.
5. Colossus-size BB design including ultra-strong chain stay, zero power loss.
6. Pannier rack + fender compatible, carry all your stuff while preventing yourself from mud splash.

Hsin Lung Accessories Co., Ltd. (HL Corp.)

信隆車料工業股份有限公司

<https://www.satoribike.com/index.php>

SATORI has been a leading supplier to the bicycle industry for almost 40 years, with a focus on providing innovative handlebars, stems and seat posts to bicycle assemblers and consumers globally. As could be expected from one of the world's largest component manufacturers, we are equipped with world-class research, design and production facilities, as well as the experience to back it up. Above all though, a passion for riding is the driving force behind our company direction and it is this deep rooted 'bicycle-minded' philosophy that fuels the development of exciting new ideas at SATORI Taiwan.

PYTHON

Thumb up for "Python" adjustable stem, angle adjust from 0 to 90 degree. Suitable for E-bike or Trekking bike, the cable routing can hide under the stem, and combine with ACROS headset, making the cable routing invisible.

BEATBOX

Beatbox, a comfortable seat post for long trip riding. An elastomer is designed in the middle of the seat post. Also, Beatbox offers 3 different hardness of the elastomer for the consumer. It allows the consumer to change the elastomer by themselves and just need a standard Allen key to complete.

EVO 35 MEDIUM

35mm bar bore handlebar is on fire in the market. Perfect for Downhill or Enduro riding. Made from AL7050. Lightweight but good strength against heavy impact. The width could make 760/780/800mm.

Booth # I1028

HSIN TA ELEMENTS LTD.

信大圓方有限公司

<https://www.htspoke.com>

Founded in 1954, HT Spoke is truly one of the pioneers in Taiwan's bicycle industry. As a forerunner in the industry, we have made it our mission to provide our customers with the best riding experience. In order to satisfy the different needs of our customers, our spokes and nipples are produced for all types of bikes, ranging from basic models to high-end race bikes. Today, HT Spoke still focuses on building the best products, ensuring a premium finish built to last.

PRO DB SPOKE

HT-PRO DB spokes get their exceptional strength from cold forging. This makes it not only extremely durable but also lighter weight thanks to the thinner middle section of the spoke. The balanced strength and weight on the PRO DB's 2.0 mm build allows for a wide range of uses, from road wheels to super light Enduro MTB wheels.

**DB AERO SPOKE**

HT DB AERO spokes are butted through a cold forging process. This makes it more light weight and stronger. In our process of blading, the aerodynamic characteristics of spokes are optimized while the material strength is increased.

**PRO TRI HEAD NIPPLE**

HT PRO TRI HEAD nipples provide easy use, lightweight and optimum performance and they are made of aluminum or copper. The HT PRO TRI HEAD nipples' unique triple shape allows users to use our specialized torx tools to screw them onto wheels.

Hubsmith

金聯富

www.hubsmith.com

Hubsmith has accumulated nearly 40 year-experience on professional cycle hub technology. Every cyclist riding bike with Hubsmith cycle hubs and wheels all over the world will have a fast and furious Hubsmith cycling life style. We specialize in the road hub, road disc hub, MTB hub, single speed hub, mini-bike hub, fat bike hub, and trial bike hub. Our products are not only with exclusive patented technologies, but also from 2012 to 2020, there have been five hub sets gained Taipei Cycle d&i awards.

HS-R080

The HS-R080 hub is equipped with a special patented design. R080 is designed to fit the "pressure angle" bearing, which is different from the pressure angle in 0 degrees of the bearing embedded in the universal hubs. There is even an adjustment system for fine adjustment. The design of the pressure angle makes the running hub smoother, and more supportive in terms of lateral rigidity. The bearing of the pressure angle not only can extend the service life of the bearing but also can be easily repaired.

**HS-Humbird CS406**

The ceramic bearings version of NEW Hubsmith wheel sets adopts the brand, CeramicSpeed high end bearings from Denmark. Data shows that CeramicSpeed ceramic bearings have excellent abrasion resistance and extremely smooth riding experience.

We reconfigure the human body and bicycle to create an innovative bike saddle. It guards your health, raises your limits and makes you stronger.

Both of innovative saddle and cycling mechanics design improve the efficiency of pedaling significantly.

The center of the saddle sinks completely. Whether you're on 24 hours cycling or 500 km challenge, there isn't any pressure on the perineum, which greatly reduces the burden on the legs and allows you to ride faster, longer and further. Every cyclist can surpass all his own peak records easily after proper practice.

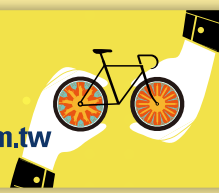

we are looking for agents all over the world.

All-wings saddle type-Falcon

1. New saddle design and innovative riding mechanics. Significantly improve the efficiency of pedaling.
2. The center of the saddle sinks completely. Whether you're on 24 hours cycling or a 500 km challenge, the pressure on the perineum is always zero, which greatly reduces the burden on the legs and allows you to ride faster, longer and further.
3. The post-modern design, shaped as falcon wings, and is designed for high-performance road bike long-distance racing.
4. Every cyclist can surpass all his own peak records easily after proper practice.

Rudy Project is a worldwide developer, manufacturer, and distributor of performance sunglasses, helmets, goggles, and prescription solutions of the highest technical level. Founded in Treviso, Italy in 1985, Rudy Project has been a global leader in the field of sports eyewear for over 30 years. By selling products in more than 60 countries worldwide, the company has re-affirmed its international vocation with its second generation of entrepreneurs, Cristiano and Simone Barbazza.

Deltabeat

Combining Rudy Project distinctive edgy design, advanced lens technology and superior comfort in a frame built with Rilsan Clear®, a high performance sustainable and bio-based polyamide developed by Arkema, Deltabeat blends optical protection and deep wraparound fit while featuring superior head grip geometry, adjustable ErgoNose system, rubber temple pads and our proprietary PowerFlow ventilation solution to minimize fogging.

Magnus

Timeless Rudy Project iconic design, wide fit and multiple prescription options: Magnus is the new model engineered to deliver the best standard of performance for sportsmen with large faces and represents a breakthrough progress in the Rudy Project 'RIDE TO ZERO' program. The Magnus frame is manufactured using Rilsan Clear® a high performance sustainable and bio-based polyamide developed by Arkema to ensure maximum durability, lightness, flexibility and shock resistance.

NYTRON

Developed and engineered in the wind tunnel with the collaboration of Swiss Side world -class aerodynamic experts, Nytron blends ultimate safety, amazing aerodynamic performance with compact and light design. Thanks to the scientific combination of massive exhaust vents and internal directional power flow channels, Nytron awesome ventilation keeps the rider head cool lowering body temperature thus enhancing overall performance. Nytron exceeds the Rudy Project WG11 experimental protocol test. The WG11 rotational impact test is a protocol adopted by Rudy Project, in cooperation with accredited and notified bodies, to test and measure the performance of the helmets against rotational impacts.

iMOTEX MOTION ANALYSIS SERVICES

IMAS can accurately analyze motion while pedaling through patented algorithm technology:

1. Provide evaluation results: Knee Joint Trajectory & Varus Valgus Determination, Lower Limb Motion Stability, Speed, Cycling Staging Ratio, etc.
2. Users can browse sports information through multiple platforms (web pages, communication software (Line APP), download as PDF), which effectively helps riders to evaluate and adjust after exercise, and improve daily training to enhance riding performance.
3. IMAS will not be limited to cycling application or object restrictions. In the future, this platform can be used in different scenarios to provide solutions of sports (running, weight training etc.) and medical rehabilitation fields.

TEKFIT Cycle Ride Leader - cycling posture assessment and training system

TEKFIT is a cycling posture assessment and training system:

1. It has the advantages of "Augmented Reality Training Scenes", "Real-Time Motion Analysis" and not limited by the space environment.
2. Assist cyclist's pedaling, make pedaling smooth. Optimize lower limbs joints' efficient while transmitting power, coordinate all the muscles, make lower limbs a better pedaling posture.
3. The motion sensors capture the knee posture and analyze cycling performance. During the training, it provides real-time posture correction, and give visual and auditory prompts when the knee joint posture is incorrect, thereby optimizing exercise efficiency and reducing exercise injuries.

INNOVA RUBBER CO., LTD.

伊諾華國際股份有限公司

www.innovatires.com

Innova Rubber Co., Ltd. was founded in 1995, mainly producing bicycle tires; wheelchair tires; baby stroller tires and all kinds of leisure race tires such as ATV tires; golf cart tires; motocross tires and others.

The company aims to focus on the creation of innovation, the pursuit of quality and customer satisfaction.

Innova has an excellent R&D team and strong production bases. Our factories are all awarded ISO -9001 certification to ensure the production of the best tires/tubes and to deliver the best quality to the final consumers for the trust of customers.

EL CAMINO II

The smooth tread center can roll very quickly on paved road. The diamond-shaped intermediate transition tread make sure this tire won't be stopped by any rough roads and long detours.

It allow for strong confidence in any road condition, providing a smooth riding experience, and maintaining good handling on unpredictable terrain with the square pattern of the tread shoulder. Suitable for riders who want to relax themselves without a destination, just for the pleasure of riding.

JOeB Ltd.

<https://joeb.jp/en/>

JOeB is the first and only OEM/ODM e-bicycle and e-motorcycle manufacturer in Japan. Our factory is now under construction in Okinawa.

We will provide Japan-quality products with our creative manufacturing process which is innovatively developed by experienced engineers from F1, Moto GP and jet plane industries and contribute to reduction of CO2 emissions through our business activities to realize a society where people can travel comfortably.

JOeB Precision Mounting Technology for Center Motor

In e-bike frames with center motors, deformation of mounting brackets due to weld distortion is a problem that cannot be overlooked.

Stresses generated in center units and variation between individual units due to the misalignment of mount shape, which caused by low-precision corrections and forceful assembly works, can adversely affect built-in drive system friction, deviation of torque sensors and water resistance of casing, all of which can reduce value of e-bike itself.

JOeB has fundamentally reexamined frame manufacturing process to adopt a unique process that eliminates mounting bracket shape errors even after weld compaction. This allows the center motor to maximize its inherent power, fine controllability and durability, without sacrificing any of its original potential.

If you visit our booth, you can actually experience precision of our assembly technology with Shimano, Bosch and Bafang center motors.

JOeB Ultra Light Aluminum Frame Technology

Our team of experienced engineers, from jet aircrafts, Formula 1 and MotoGP, have completely rethought road race bike frame structure to offer a new aluminum frame that maximizes light weight and driving performance.

Taking advantage of quality of Made-In-Japan aluminum with unique specifications inspired by MotoGP, we have achieved maximized pedaling efficiency and traction by utilizing overall frame flex which is achieved by continuously changing stiffness of pipes from top tubes to seat stays and from down tubes to chain stays.

In addition, by eliminating welds, which are stress concentration areas in conventional frames, variations in frame strength are reduced and a high level of strength reliability can be ensured even with

Joe's no flats - Adhestick innovations Ltd.

www.joes-no-flats.com

Joe's No-Flats provides the bicycle market with the world's most effective anti-puncture award-winning sealant. Our product line includes both latex based and latex and ammonia free sealants, with tubeless solutions and accessories, self-sealing tubes, tubeless conversion kits, lubricants based on the most advanced Nano technology, excellent cleaners and bio-degreasers and more.

Joe's super sealant

FOR THE SAFEST AND MOST EFFECTIVE SEALANT that works with all types of bike wheel systems, you need a name you can trust. Joe's No Flats is a reliable, leading and innovative manufacturer who has been faithfully serving professional bike riders world-wide for the last 17 years.

Joe's Eco-Nano Dry Lube

Highest efficiency & Environmental Friendly.

The EUROBIKE 2012 award winning Eco-Nano lube is the only lube that combines Nano technology with Eco based materials.

It will dramatically decrease the need for re-lubing between rides.

Delivers a smoother and longer ride.

Coats the chain with a thin layer of PTFE.

Contains unique Nano-particles for superior friction reduction.

Water based - Eco friendly.

VOC Free.

Joe's Eco Sealant

The ultimate sealant for Tubeless Ready and Converted to Tubeless tires

Designed specifically for Tubeless Ready and converted to Tubeless tires.

Instantly stops punctures - up to 6mm.

Prevents air leaks from thin side walls.

Ammonium free - no damage to the rim.

Latex free - no risk for allergic reaction.

Won't leave sticky residue in the tire.

Environmentally friendly.

Compatible with a wide range of temperatures (-20°C - +70°C).

Compatible with a wide range of pressures (15PSI - 120PSI).

For effective puncture resistance, add fresh sealant every 3-12 months depending on quantity and weather conditions.

ANYPLACE. ANYWHERE. ANYTIME.

The MACINA CHACANA is your daily medicine against wanderlust!

Compared to the trail orientated models, the CHACANA is a comfortable touring bike. Thanks to the masterful work of our engineers, the proven KTM frame geometry has been retained despite the new increase in battery size and capacity.

Removing and reinserting the battery is easier than ever before. POWER TUBE TOP LOADER (PTTL) is the name of KTM's own innovation for this user-friendly battery handling.

KTM MACINA PROWLER EXONIC

ALL IN. ALL OUT. The Ace up your jersey sleeve. With the MACINA PROWLER, our development team has literally gone 'All In'. This bike has been thought through, conceived and trimmed to perfection down to the last detail. 180 mm travel at the fork and 170 mm travel at the rear quickly make it clear that this bike is intended for demanding trail and enduro use.

The carbon frame is fitted with the proven DiMMiX tires: 29" wheel at the front for optimum riding stability paired with the 27,5" PLUS tires at the rear for best power transmission and traction, show all its advantages in difficult terrain. The heart of these bikes is a newly developed frame with the proven STRAIGHT-LINE-LINK (SLL) concept and the new BOSCH SMART SYSTEM. The system also includes the BOSCH PERFORMANCE LINE CX motor and the most powerful BOSCH POWERTUBE battery ever (750WH) for even more range.

KTM X-STRADA PRIME

GRAVEL UP YOUR LIFE. If you want to get the best out of every situation, then the KTM X-STRADA range is the right choice for you. Gravel is not a trend, it is here to stay and makes for a very memorable ride. We have responded to the huge demand for our X-STRADA with all new developed PREMIUM CARBON frames. This impresses with its clean and modern design. It's constructed for a maximum tire width of 45mm. The ROCK SHOX RUDY ULTIMATE fork with 40mm travel also makes its debut on the PRIME. Whether with or without suspension travel, your KTM Gravel experience will be more intense than ever before.

2-coat system powder coatings

The advantages of 2-coat system powder coatings:

1. There are no odors and solvent volatilization, so powder coatings can protect the environment and reduce carbon footprint.
2. Applied by electrostatic adsorption, powder coatings are easy to thickly coat without sagging. With great protection, they have great corrosion resistance and impact resistance.
3. Powder coatings do not require primers because they have excellent opacity. They have high production efficiency. Besides, they can be recycled to save costs.
4. With the protection of a 2-coat clear topcoat, they are both aesthetic and high-glossy. They have good weather resistance.

Powder coatings

The advantages of powder coatings:

1. There are no odors and solvent volatilization, so powder coatings can protect the environment and reduce carbon footprint.
2. Applied by electrostatic adsorption, powder coatings are easy to thickly coat without sagging. With great protection, they have great corrosion resistance and impact resistance.
3. Powder coatings do not require primers because they have excellent opacity. They have high production efficiency. Besides, they can be recycled to save costs.
4. With high stability and stunning colors.

Electroplated powder coatings

The advantages of electroplated powder coatings:

1. There are no odors and solvent volatilization, so powder coatings can protect the environment and reduce carbon footprint.
2. Applied by electrostatic adsorption, powder coatings are easy to thickly coat without sagging. With great protection, they have great corrosion resistance and impact resistance.
3. Powder coatings do not require primers because they have excellent opacity. They have high production efficiency. Besides, they can be recycled to save costs.
4. There is no harmful heavy metal in powder coatings. They do not require electroplating treatment. In order to protect against oxidation, add a 2-coat clear topcoat. They have high reflectivity and metallic luster.

Kynamic Inc.

www.kynamic-ebike.com

Kynamic was founded in 2021, with a ten-years experienced team in e-bike industry. We not only contribute our innovative development and knowledge of e-Bike system, but also offer a complete service throughout the entire e-Bike lifespan. The services – frame design service, logistics service and warranty service we offer aim for helping customers reach to their targets quickly, efficiently and even gracefully.

Innovation on you, Engineering in Kynamic! To those who have crazy ideas on e-bikes, come to work with us to turn your ideas into real.

e-Bike Drive System

- Provide the complete e-system, including the motor, controller, battery, HMI, sensor and accessories.
- Upgrade the one-stop service from production to after-sales service through software management in cloud.
- Local delivery and in-time technical support in Europe, support for the higher flexibility of the production plan and lower pressure of cash flow for European customers.
- Designed various e-Bike prototypes, refer our sample BOM and frame design to brainstorm the innovative ideas and speed up the new projects.

Lih Jaw Industrial Corporation has been a professional high security lock manufacturer in the security field of e-bike, bicycles, scooter, motorcycle, boat and hardware since 1993 in Taiwan. Our products have attained several patents and some have passed SBSC, FG and ART approval. Major products include Foldable lock / Adjustable lock/ U lock / Disc lock/ Padlock/ Stainless lock/ Chain/ Chain lock / Cable lock/ Bone lock/ Floor lock.

4 Sections Foldable Lock

- Made of heat treated alloy steel which resist saws, cutters and hammers.
- The shackle is covered by PVC protection.
- Approved by SBSC and FG.
- Anti-theft cylinder.
- Special in lock flexibility design.
- Easy storage with bracket.
- Recommended for securing bicycles, E-bikes, scooters and gates.

8 Sections Foldable Lock

- Alloy steel, hardened with heat treatment
- 6.5 mm steel bars with nylon coating
- Anti-theft cylinder with anti-dust cap
- With NP keys
- Recommended for bicycle, heavy duty motorcycle, E-bikes.
- Bracket available attach to the bottle holder hook or the frame.

Padlock with Chain

- Shackle and lock body are made of alloy steel.
- ABS cover against hitting and attacks.
- Approved by SBSC (class 3).
- Anti-drill cylinder. Keyhole cap to against dirt and corrosion.
- Able to use with a chain made of alloy steel.
- Ultra resistant to saws, cutters and hammers.
- Nylon sleeve to protect the chain.
- Approved by SBSC (class 3).

Microprogram Information Co.,Ltd.

微程式資訊股份有限公司

www.program.com.tw/en

Microprogram offers the technical services of industrial IoT. We commit ourselves to bring all of us a better and sustainable life. We focus on the three major fields of e-payment, wireless sensing, and cloud data. Based on the core technologies of user research, vertical integration of software and hardware technologies, edge sensing devices, mobile apps, cloud service platforms and big data analysis, we are able to help different industries, including transportation, finance, retail, manufacturing and bicycles, to innovate and upgrade themselves.

"Bikonnnect" which combines "Bike" and "connect" for "an infinite amount of bicycle connection possibilities." With the ""Connect Your Bike, Ride the Future"" brand slogan, Bikonnnect provides one-stop technology digitalization services such as the E-Bike Computer, E-Bike App, Store Management System, and Cycling Data Platform to achieve a win-win situation between riders, brands, component manufacturers and stores.

E-Bike Data Service Solution

The "E-Bike Data Service Solution" provided by Microprogram enhances E-Bike cyclist experience and bike brand service value with IoT and Big Data to make smart technologies improve global competition for E-Bike. Compared to regular bicycles, E-Bike offers the advantage of power supply, and E-Bike data service has combined E-Bike Computer, IoT Device and E-Bike App, which could provide cyclists' real-time dynamic cycling data and E-Bike system data to the cycling data platform to bike brands or component manufacturers. Through cyclists' data to assist the brand's business decision-making and remote device management, the E-Bike digital upgrades practically to create more added value for brand owners. For cyclists, a series of smart E-Bike devices, including E-Bike Computer and E-Bike App, make the cyclists' experience more intelligent, reaching a win-win situation for cyclists, bike brands, dealers and component manufacturers.

Smart Lock for E-Bike

This intelligent E-Lock is an RFID smart electronic lock designed for bicycles and E-Bike, which is developed by the collaboration of Microprogram and a domestic professional locking manufacturer (Yuan Wen Shing Industries Corp.) This lock is easy to use and secure through CAN Bus communication interface to lock & unlock more elegantly and conveniently by the integration into E-Bike system or RFID Tag. The unique latch design ("lock-to" feature) also locks your bike on to the railings or bike racks with an additional chain to enhance anti-theft, which is suitable for bikes or E-Bike the best safety protection.

E-Bike App Software Service Solution

Microprogram established the Bikonnnect smart bike brand in 2019; the naming of the brand originated from the combination "Bike" + "connect" to convey "a bike connection to create infinite possibilities" brand spirit. Bikonnnect has already launched a series of E-Bike products that focus on EV Micromobility, allowing E-Bike cyclists to have smarter riding experiences by connecting hardware devices with software platforms.

The E-Bike App is a software application service developed by Microprogram; it can upload the riding data to the cloud in real time, and is able to diagnose the status of the bikes with one click. The latest version of the App supports the functions of binding the smart E-Bike devices such as IoT Device, E-Bike Computer/ HMI, E-Lock to make it easier for cyclists to synchronize related riding data, and adds support for anti-theft features and automatically records the riding routes. This product also provides a "White Label" version which can be customized according to the requirements of the brand operators to assist the traditional bike industry in welcoming the new digital transformation era.

E-Bike Computer

- Connected to E-Bike App with Bluetooth
- Display E-Bike cycling data
- Update the firmware with Bluetooth and E-Bike App
- CAN Bus / CANopen communication interface
- Certifications: EN15194 / ISO 15849-1

IoT Device

- Real-time data transfer from E-Bike to Cloud and App
- GPS for vehicle locating
- Integrated SIM card for internet connectivity
- Connect the E-Bike App with Cellular network or Bluetooth
- Integrate with E-Bike system via CAN Bus

E-Bike App

- Cycling record uploads and riding navigation
- Anti-theft, remote tracking and real-time connectivity cloud service with IoT device
- Diagnose the E-Bike system health or update the system Set for improvements
- Automated service notifications
- Make a repair and maintenance appointment easily

*White label versions, customization options available

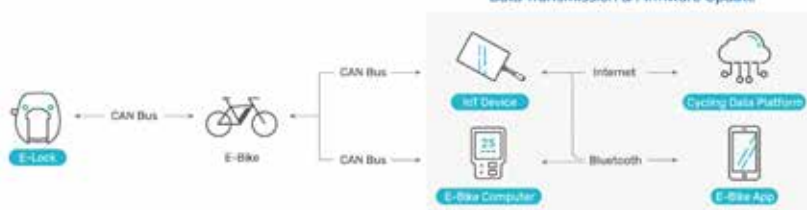

Smart Lock for E-Bike

- Smart electronic lock specially designed for E-Bike
- With CAN Bus communication interface for integration with E-Bike system or IoT/ connectivity device
- Lock/Unlock operation via App
- Integrated RFID function, lock/unlock operation by RFID Tag
- Equipped with LED to display successful lock/unlock

ANTI-ULTRAVIOLET DOUBLE-LAYER ANTI-FOG LENS

100% UV anti-ultraviolet double-layer anti-fog lens: the outer lens is PC anti-explosion lens and the inner lens is Italian imported anti-fog lens which can prevent fog on lens for a long time. The outer lens is electroplated and can effectively avoid the strong light in the snow.

TWO-SEGMENT DOUBLE-PULL RIBBON

The two-segment double-pull ribbon is a fashionable style specially designed for women in skiing.

Booth # K0916/Virtual Booth

NUVO ENT. CO., LTD.

乃興企業股份有限公司

www.nuvo.ws

NUVO ENT. CO., LTD. was established in 1969 and dedicated to bicycle parts producing and developing.

We produce Bicycle Accessories which includes Kickstand, Bell and Bottle Cage and Carrier. In recent years, to catch up with the booming of electric bicycles, NUVO specialized in the plastic injection and metal manufacturing processes, has developed a number of products such as battery cover and chain protector. 80 % of NUVO's products are exported to Europe market, and nearly 20% are exported to the United States, Canada and Japan, etc.

During the past 52 years, we always keep our religion "honesty, profession and responsibility" to maintain the long-term relationship with our customers. No matter in domestic or in international, our products awarded many patents. Our motivation is simply to improve cycling life.

n+1 Electric Bike Bell

- n+1 Electric Bike Bell design with small size and modern fashion look. Built in boost circuit with loud sound reached 85-120 db
- With rechargeable 280 mAh lithium battery, used more convenience .USB cable charge 1.2 hours full charge.
- Contains USB cable,1.2 hours full charge. One charge have 1200-1300 times ring bell can work about 15-20 days
- Have 3 different bell sound modes, dust resist, IP 65 waterproof level
- Easy to install: put the rubber strap fixed on the handlebar suit for 0.86"-1.25"(22.2-31.8 mm) diameter bicycle handlebar.
- Please pay attention when charging the bike bell, the indicate light red is on charging, full charged is green light.

n+1-BC131C bottle cage

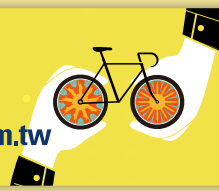

This is our top-entry bottle cage, designed using a biomass plastics (Low Co2 / high performance material) it is incredibly light and optimized to fit standard size of water bottles securely.

This green material is neither biodegradable plastic nor recycled plastic. This is 62% bio-renewable content (Castro oil) which means producing this material could reduce 50% of carbon emissions. Here's why that's a good thing. The cage is simple, light, and durable—and now there's a lot more to love about it.

Material: Green material

Weight is only 19g

Color: Black/Red/Army Green/Grey

n+1-BC303P side bottle cage

n+1-BC303P

n+1 Side bottle cage

This side load cage comes in a minimalist one-piece design, and features a patent L-shaped adapter that allows you to customize which side (Left or Right) you would like to access your water bottle from. In addition, we design the special screw hole for this bottle cage so it will take less than 5 seconds to change from left side to right side, unlike typical bottle cages that come fixed in preset left or right-handed versions. On the side of bottle cage, it comes with a rubber strap that you can hold your water bottle tight while you riding your bike.

- Fits Most Water Bottles: Wraparound arm design fits most standard sized bike water bottles, including 20-25 oz. (500-750 ml) sized bottles.
- Unique L-shaped adapter allows you to customize which side of your bike you can access your bottle from.
- Flexibility - most water bottles will fit this because you can adjust the holder with a rubber strap
- Design - unique, minimalist design that just looks cool.

Booth # K0802

OTRAJET Inc.

歐特捷實業股份有限公司

www.nexell.tech/en

Year 2021, OTRAJET Inc. launches NEXELL physical foaming injection technology to replace the traditional chemical foaming process. The technology can be applied to many kinds of material requirements. Products made of NEXELL not only have better mechanical performance, but also can be recycled together with runners during production, to be remade into whole new products with different foaming grades, achieving zero waste and zero pollution. With long term development and test, we can now produce elastomer products just with one-time injection by NEXELL technology, saving enormous manpower and accelerating production. As long as you care environmental protection and sustainability as we do, you are the most welcome to share your ideas and solutions, together to build a wonderful future for the Earth!

Airless Tire

- Burst proof inflation free
NEXO tire is formed by NEXELL with millions of cells filled with gas-N₂, not only provides stable pressure, but also erases the trouble of air-pumping.
- Longer abrasion and durability
NEXO tire passed 5,000km treading durability test under JIS standards and results reveal tread depth decreased only by 0.2mm.
- Exclusive patented safety device T-BOLT

T-Bolt keeps NEXO tires in the center of rims, preventing rim-out and tire twisted.

- The lightweight technology

The weight is reduced by up to 40% compared with traditional burst-proof pneumatic tires, so biking with solid tires is much easier and more comfortable without the heavy weight.

Bicycle Saddle

- World's first physical foaming bicycle saddle

Using advanced technology - Supercritical Fluid Physical Foaming (SCF) into our physical foaming process. Bowled by natural gas N₂ instead of chemical agent.

- Environmentally friendly

Only TPU material used and the whole process is non-toxic, odorless and no chemical residue. Plus, the products are 100% recyclable.

- Co-mold with upper fabric(no more adhesive)

Saving you lots of manpower and cost.

Physical Foaming Elastomer Products

Excellence mechanical properties: high strength, high rebound, scratch and wear resistant, oil resistance, hydrolysis resistance, acid and alkali resistance

Offers a wide range of hardness scales with various densities levels

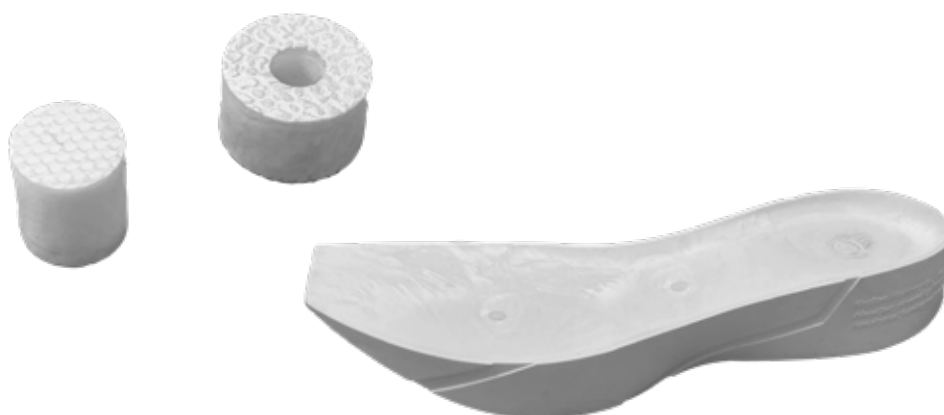

30-55 durometer by Shore C gauge

Density available from 0.18~0.6 g/cm³

Resilience available from 50~65%

REACH and RoHS tested for restricted chemical substances test

Suitable for sports, medical, home and automotive industry application

Simplicity Urban Commuting

Convenience is the key to sensational commuting experience. The MOOVE is designed to extend your travel.

Booth # L0532

PORTAPOEWR(HK)Ltd.

<https://www.portapower.com.tw/#/>

Portapower is a reputable battery packs and E-bike system manufacturing company. We have accumulated more than 30 years of extensive practical experience, and sell well in Europe and USA. Portapower provides total energy solution for local and overseas customers. We are devoted to the development production and sales of products like lithium battery packs, chargers, motors, controllers, display meters and sensors. We have in-house production lines in our factories in Guangdong, Hunan and Taiwan, to fulfill the rapid growth of electric bicycle market universally. We have also established a service center in Berlin to provide excellent and timely after-sales service for our European clients. With Hong Kong's headquarter and these branches, we are able to integrate R&D design, sales and services to satisfy both diverse and specific consumers' needs globally.

Battery packs

PortaPower Electronics has a dedicated and experienced R&D team, which can support and satisfy both diverse and specific consumers' needs in the market. With lithium battery packs being our core and best-selling product, we continue to provide high quality rechargeable batteries of different size and types, and related accessories for customers worldwide. Furthermore, the unique design of our rear carriers and multi-fit battery packs released ten years ago has taken European market by storm and attracted a lot of promising buyers. Three years ago, Hong Kong PortaPower again innovatively developed an integrated down tube battery pack, which not only became the impetus to the bike industry, and also continue to stay on the cutting edge of battery technology and marketing.

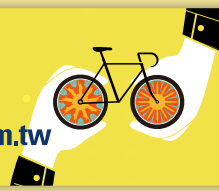

Speed & Torque Sensors

Our specially designed axis torque sensor, internal speed sensor and external speed sensor are all launched with affordable prices. It serves as an intuitive and responsive feature on the bike, making your ride smoother and more enjoyable. On the other hand, the torque sensor has a better performance for climbing. Whether you're out for long ride or have a slope to climb along your normal commute, a bike journey with torque sensor will feel more energized instead of drained. These features take you farther and makes it simple for anyone to hop on and have a great time. Going over rough terrain and up hills becomes much easier with E-bike sensors.

For inquiries, please contact: arielle.tsai@portapower.com.tw

Display Meter

We offer LED/LCD/TFT/OLED display meter, certified with ISO13849-1, is another unit of a complete E-bike system. We exclusively developed display meters with IP65, Bluetooth and USB features. It can indicate the point of failure on the display through the detection system, alert and allow user to troubleshoot errors such as braking abnormality and communication abnormality in time to ensure users' safety. LCD/OLED/TFT displays keep track of the values of all the vital parameters that need to be aware of while riding. These include the mileage, power-assist level, battery, wattmeter – to show the instantaneous power output, and so on. There is no doubt that the major advantage of displays on e-bikes is they enable riders to monitor their performance and adjust accordingly. It is critical particularly to individuals who cycle for health benefits.

Roxim Technologies, inc.

祐泰科技股份有限公司

www.roxim.net/en-gb/

ROXIM established in November, 2009. ROXIM is dedicated to developing innovative and revolutionary improvements onto bike lighting systems based on human technology and adhere to the safety guidelines based on German cycling road regulation. Combines fashion and function, we offer products for different types of bikers, such as mountain biker, city biker, road biker, etc. Our mission is to deliver a superior night riding experience - Brilliant, Safe, Comfortable, and Green. We devote our passion into turning ideas to reality.

ECE Adaptive Auto-Scene e-bike Light, Z7E PRO

Roxim Z7E Pro, a ECE R113 and R87 compliant front light has a brilliant Auto-scene functions which utilize automotive High/Low beam, Daytime running light (DRL) and with the integrated smart sensor control which provide the right lighting mode during scenarios change, ensuring a pleasant and safe experiences for the riders. When the light under auto modes, it will automatically shift to daytime running light during day time to improve the drivers and riders' a full attention and make it obvious to avoid dangerous situations. Not only that, the smart front light will switch to the proper lighting mode based on conditions of ambient brightness which makes lighting modes automatically adapt to different types of riding, such as position light and low beam function will turning on during the night time or enter tunnel to improve the rider's safety and visibility in every situation. With the highly integrated remote button of a brake lever, it allows riders to control low and high beam function easily. No matter in the city or away from the city, riders could adjust proper lighting mode by only at the touch of a button for a better vision on variety of riding environment you are currently in.

German Auto Brake E-bike Tail Light – R7E

The R7E auto brake tail light, a high uniformity superior 2in1 tail light which complies to German K-Mark regulation and with position and auto decelerating lighting together. Highly efficient LEDs with Roxim's diffuse optical design makes the light soft, reliable and stable. The ultra-wild side beam makes the e-bike visible from afar and from all sides. This sim-automotive rear light ensuring riders to enjoy a pleasant and safe riding experiences.

A built-in highly sensitive smart sensor to correctly detect speed change then start up the decelerating light to warn the vehicle behind the cyclist automatically which all done without requiring any user interaction to keep riders safer and more aware while cycling on the streets. In addition, the fall detection of R7E can also warn of a danger by turning on flashing light to alert others when it detects a tilt.

The flat shape of the R7E makes it easy compatible with almost all standard carrier mount or integrated with carrier. And the rugged aluminum holder is a load-bearing part of the rack.

SAMUEL INDUSTRIAL CO., LTD.

山姆實業有限公司

<https://lin4498r.wixsite.com/samuel>

Samuel Industrial Co.,Ltd started in 2008 with the maintenance of road bikes.

Main business items now

1. Self-owned brand: Samuel road wheel set (UCI certification)
2. Carbon fiber composite material repair (certified by the Composite Material Association of the Taiwan Ministry of Economic Affairs)
3. Customized painting service

HABER Road bike disc brake wheel set

1. 10~13 speed systems of various brands can be used
2. Carbon fiber wheels + aluminum alloy spokes + titanium alloy spoke caps make the wheel set very light and strong, suitable for used in various environments
3. There are only 16 spokes on the front wheel, which can effectively reduce the influence of wind cutting turbulence on the steering stability of the wheel at high speed and cornering.
4. 28 wide rim is suitable for 25~32 tire installation, more comfortable riding
5. Hubs and spokes provide better driving and stability of the wheels for the locking combination
6. Titanium alloy spoke caps and aluminum alloy spokes are beautiful in color and weather-resistant

SAN FANG CHEMICAL INDUSTRY CO., LTD.

三芳化學工業股份有限公司

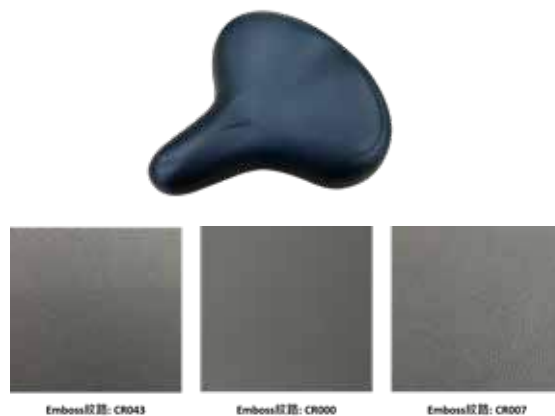

www.sanfang.com/en

San Fang Chemical Industry Co., Ltd. was founded in Kaohsiung in 1973. The major products are artificial leather, technological films, fibers, functional yarns and special non-woven fabrics, etc. We develop key raw materials and application technologies, we also established a diversified market, and actively produce environmentally friendly products and a circular economy, recycling, and bio-materials of functional leather, film, yarn, fiber, non-woven fabric, and other related manufacturing and applications. San Fang takes energy-saving and carbon-reduction as the purpose of environmental protection and fulfills our corporate responsibility for environmental protection issues.

San Fang actively cooperates with domestic research institutions, government agencies, and universities to develop innovative and high-functional products. It has close cooperation with world-famous brands of sports and casual footwear in shoes, apparel, and sports goods products. We also joined the electric vehicle interior development platform recently became a member of the electric vehicle supply chain and invested in the field of solar energy materials.

AEGISKIN® Vacuum Forming Film

As the governments and global brands have announced the environmental and renewable energy policy for the next decade. AEGISKIN® is born to be a new material solution for bicycle saddle skin with DMF & plasticizer-free, which has certified REACH, RoHS, and PAHs Compliant. With its outstanding stretch & strength ability, AEGISKIN® is suitable for the vacuum forming saddle process with types of foam and shell.

ALEPHAB® Water-based PU Leather

SAN FANG's water-based PU leather makes a more efficient and eco-friendly production line with less industrial waste and Greenhouse Gases emission than wet process PU leather. With high stretch ability, ALEPHAB® has the outstanding performance of heat press (High Frequency), printing, and stitching for handmade and vacuum forming saddles. Its physical property of high abrasion, hydrolysis, and solvent-resistance combines efficiency and quality.

Shen Yang Bicycle International Co., Ltd.

昇陽自行車

www.sycycles.com

Shen Yang group is characteristic of

- ◆ Credibility & Honesty
- ◆ Mechanical Profession
- ◆ Sales Performance
- ◆ Service Quality
- ◆ Speedy Delivery

We are always thinking ahead and prepared for the future, which is essential for managing huge Asia-Pacific Market. Think globally, footing locally.

ARGON 18 SUM PRO

MY22 Brand new Model SUM is the ultimate racing road bike. It is the best performer on any road terrain, the one to be chosen no matter what the route profile and conditions. With ultralight and aerodynamic carbon frame that weighs under 750 grams which bring SUM be the fastest bike on climbing and touring. Argon 18 just had to strike the perfect balance between weight and aerodynamics, SRAM's highest-end wireless electronic drivetrain and our best climbing wheels give you every edge against the competition.

5010

The 5010 turns obstacles into features. Its nimble, poppy feel makes even the most mundane rides feel like they're loaded with features to hop, skip and jump over. It's the kind of bike that makes new trails feel as familiar as the back of your hand.

27.5 is the fun-sized wheel size. Smaller wheels provide an ideal balance between toughness and weight saving making them the most fleet-footed (or quick fingered) whether launching logs or weaving through stumps. With its quick and agile character, the 5010 has become a go-to plaything for progressive riders the world over and the only contender on any backyard trails.

It's a bike that goes harder than its vital stats may suggest. A 140mm-travel fork is paired with 130mm at the rear, the lower-link VPPTM configuration of which leaves you feeling there's a lot more travel at hand. And you can choose how out of hand you want to get, as this pocket rocket fits all sizes and types of rear shocks.

Tacx NEO 2T Smart

THE PINNACLE OF INDOOR TRAINING, RAISED EVEN HIGHER

With an improved design and revamped components, the NEO 2T Smart trainer provides a more immersive experience, measures total power and left/right balance and more.

- Improved stillness means a quieter ride. So go ahead, really let loose.
- You care a lot. So we measure a lot. Like power and cadence to within 1% accuracy.
- Are you balanced? See your left/right leg power balance on your app or Edge® bike computer
- It's the closest thing to riding outdoors you'll ever find indoors.
- You don't have to miss the feel of the road. It's right here.

SKS GERMANY

www.sks-germany.com

As a leading manufacturer of bike accessories, we have been ensuring that wheels roll for almost 100 years. We breathe life into our slogan Ride on! day after day: pick up speed and keep on the road to success without detours. With tried and tested products, innovative solutions and fresh ideas. The "Made in Germany" label of quality reflects the high demands we place in quality, function and design. The products are developed in our internal development and design departments before they are put through their paces.

High quality mini pumps and frame pumps, precise suspension pumps and stand pumps in addition to the cult product, the RENNKOMPRESSOR, characterise the air pump range. The pumps are characterised by comfortable features, high pumping performances and robust materials. SKS GERMANY has a global reputation for its innovative mudguards for all wheel and frame sizes. They provide optimal protection from dirt and splash water.

In addition to compact bike tools, chainguards, bottles, bottle cages and bags, the new BIKE LIQUIDS have also been integrated in the SKS range in order to provide even greater biking comfort with additional accessories.

ONWARDS TO SUCCESS WITHOUT DETOURS

The global market has created an environment in which it is a challenge (and a passion) for traditional companies to continue to competitively manufacture in Germany, and to provide employment to over 300 employees in the region. In addition, up to 30 young people are continuously in training at SKS for a future in business. SKS has been awarded the seal of approval with the title of »Ausgezeichneter Ausbildungsbetrieb« (Excellent Training Company). Youth and amateur cycling sports clubs and regional cycling events are regularly supported by SKS. The annual Mountainbike Festival, »Mega-Sports«, takes place in Sundern where participants from all over the world attempt to conquer Sauerland's heights in this challenging SKS Bicycle Marathon. Professional bicycle equipment is proudly produced in Sundern and displays the distinctive logo in the characteristic SKS orange. A color that represents strength, action and progress and blazes like the fire which has burned tirelessly in the heart of the company for over 90 years.

AIR-X-PLORER DIGI 10.0

Powerful floor pump with a digital pressure gauge

Precise: The SKS AIR-X-PLORER DIGI 10.0 floor pump impresses with a high-quality LED digital pressure gauge. The first-class sensor technology guarantees high measuring accuracy and delivers precise air pressure values up to 10 bar. Other features include the soft-touch handle, the extra long high-pressure hose and THE "MV EASY" MULTI VALVE head for all valve types.

First-class sensor technology

The large steel tube and the solid metal base guarantee good power transfer, ensuring that higher pressures (476 cm³ stroke) can be easily pumped into the tyres.

- Digital pressure gauge for maximum measuring accuracy
- Sturdy steel tube / metal base

For inquiries, please contact: frederik.reichert@sks-germany.com

- Booth #**
- Long high-pressure hose
 - Ergonomically shaped soft-touch handle
 - "MV EASY" MULTI VALVE head for all valve types
 - Made in Germany

AIRMOTION 12.0

Floor pump with user-friendly details

Smart: The AIRMOTION 12.0 promises maximum emotions when pumping up to 12 bar (343 cm³ stroke). With its metal base, the 715 mm steel tube and intelligent features, it is a real highlight both visually and technically. The precision pressure gauge at the top, the long hose with the "MV EASY" MULTI VALVE head and the soft-touch handle make the AIRMOTION a top-class floor pump.

Pressure gauge at the top for good readability

For use in the workshop or during competitions: it is very easy to transport thanks to the ribbed recessed grip.

- Sturdy steel tube / metal base
- Precision pressure gauge at the top
- Long high-pressure hose
- Soft-touch handle/recessed grip
- "MV EASY" MULTI VALVE head for all valve types
- Made in Germany

AIRKOMPRESSOR 10.0

Floor pump with a large precision pressure gauge

Reliable: The SKS AIRKOMPRESSOR 10.0 floor pump is equipped with a 80 mm precision pressure gauge for optimum readability as well as a long high-pressure hose, which makes pumping more comfortable. With its steel tube and robust plastic base, the pump has a sturdy appearance and the plastic handle is handy and robust.

Compact, sturdy and reliable

Even high tyre pressures up to 10 bar (436 cm³ stroke) are no problem for the pressure booster. The optimised "MV EASY" MULTI VALVE head is suitable for all valve types.

- Sturdy steel tube
- Easy-to-read precision pressure gauge
- Long high-pressure hose
- "MV EASY" MULTI VALVE head for all valve types
- Made in Germany

TAI-WORLD MFG. CO., LTD.

景福事業股份有限公司

www.masstec.com.tw/?fbclid=IwAR21IMlzMdluXAYKXBfmr-c2nMcken7yIGgDlwAE8q14Pkj-LLdi5qJOSY

Tai-world-Mfg.Co owned high-level manufacture and stronger precision machining substructure; with safety as a precondition to development of high quality hub material and innovation hubs design.

The establishment of "OXTEC" brand is for product high stronger hub and wheels set; use in the mountain, road even in the racing bikes is very suitable. The core of bike industry is Safety and Instant Engagement. OXTEC business core principle is Safety, Quality, Service, Commitment and Value.

Continuous research and development, testing, production, total quality management, timely detection and AQL, to ensure safety as the only standard.

hub

Tai-world has 42 CNC machines in house, have R&D team to innovate. Also serve our test machine to keep testing our product. The main markets are Europe and Japan, and actively expand high-end consumers.

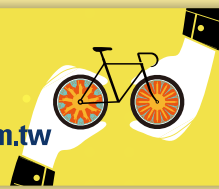

All OXTEC rear hub's feature:

1. Invention Patented for the 20 years in the roller clutch mechanism.
2. Instant roller clutch engagement during the power stroke and instant disengagement when coasting.
3. Silent operation before, during and after roller clutch engagement.
4. Compatibility with Shimano Hyperglide® compatible cogs.

hub

Oxtec hubs are compatible with both mountain bikes and e-bikes along with four advantages First, hub is driven once pedaling starts, which gives instant power output. It creates instant roller clutch engagement at power stroke and disengagement when pedaling stops. Second, the freehub has zero clearance which can reach 100% pedal power output. Third, it is low resistance, the hub provides nearly none resistance when coasting, with the distance twice longer than a traditional hub under the same condition. Last, it is noise-free, the hub operates silently before, during and after roller clutch engagement.

TAYA CHAIN

大亞鏈條

tayachain.com

TAYA CHAIN was founded in 1969, specified in manufacturing bicycle chains for over 50 years. In order to provide high-quality products and services to customers, TAYA reinvests 10% of its annual surplus in R&D, Intellectual Property and Process Improvement. In return, TAYA had received many awards and certifications worldwide.

EBIKE CHAIN SERIES

1. Compared to hard chrome electroplating, TAYA E-Bike series with exclusive Super DHT technology improve surface hardness by up to 125%.
2. Using baked-in coating to smooth the shifting. In the meantime, it doesn't add extra thickness to the chain.
3. Super DHT provides a solid base to the chain. The easily maintain feature minimizes chain wear, prolonging the life of chain.

GALAXY SERIES

Galaxy surface treatment on the chainplate captures the sparkle of the galaxy into your cycling journey. There are three color choices of the galaxy series including blue, green, and purple-red. Mirroring and glossy surfaces also ensure end-user in easy rinse and maintenance.

GST ANTI-RUST TREATMENT

1. Bike parts with exclusive GST coating have sustained 1000 hours of the salt spray test extending the corrosion resistance of chains and bike hardware to 25 years!
2. GST bike parts are eco-friendly, 100% hexavalent chromium free, and complying with RoHs and REACH standards.
3. The "Black Diamond #304" technology is part of TAYA's GST surface treatments, giving a black colour option to stainless steel components. The coating is consistent and even providing a scratch-resistant surface in the toughest of environments.

Velo Europe S.r.l - Prologo

<https://prologo.it/en>

Prologo was born with the ambition to become the leading manufacturer of quality saddles and gloves in the world, bringing innovation and changing the way we think about cycling in the different disciplines: Road racing, XC, Cyclocross and Gravity.

Our sponsored athletes and teams have won Olympic and World titles, as well as iconic races such as Tour de France, Giro d'Italia, Tour of Flanders and many more.

Our innovative and patented technologies are designed in collaboration with the excellence of the cycling world and then developed to guarantee the best riding experience for everyone.

Prologo is developed with the Pros and made for everyone.

Energrip Gloves

The revolution in the world of cycling. A natural extension of the hand that enhances grip and absorbs ground vibrations. A new synergy between man and product.

The new Energrip, with Prologo's patented CPC (Connect - Power - Control) cycling technology and its design, the result of research with our partners. The whole glove palm has been redesigned from scratch analyzing pressure data on the hand surface.

That's why the new layout features an improved ergonomics and two different types of CPC (technology patented by Prologo). But tech is nothing without interface. Prologo has enhanced the contact points between user and glove with two fingertips and a puller on the base

As a plus, the air flow has been optimized with air intakes and breathable holes distributed all over the palm that keeps rider's hand dry.

Back of the hand is characterized by an ultralight and anti-stretch Polyestere fabric. Meshes allow a discreet transpiration in hot days too.

Scratch M5 CPC

Scratch M5 CPC, the new level of performance. The CPC technology is the same as that used in Formula1, patented by Prologo for the cycling industry. The 3D polymer cones maximize grip when taking an aggressive stance, while also helping to quickly change position on the saddle.

Thanks to the new "T SHAPE" design, size and ergonomics the SCRATCH M5 CPC is a unisex (men and women) saddle suitable for multi-category use.

The MSS- Multi Sector System seat system, designed in collaboration with the Milan Polytechnic, helps to improve comfort and performance. The active and separated foams create five zones that work in an intelligent and individual way favouring the normal pedalling movement both in pushing and pulling phases.

For inquiries, please contact: marketing1@prologotouch.com

The round shape of the SCRATCH M5 CPC allows the pelvis to rotate naturally, creating stability and support for the lumbar areas; it also helps distribute pressure over a larger surface area. Available both in the closed version or with the Cut Out.

Proxim W450

Proxim W450 Performance, the official saddle of the EWS and E-EWS 2022, developed thanks to Prologo's winning experience.

Forget discomfort and pain while pedaling uphill and control the bike on the downhill.

Proxim W450 is the enduro saddle you need: strong, light, comfortable. Developed thanks to the feedback of the best athletes. For this reason, it will be the official saddle of the EWS and E-EWS circuit.

The patented MSS technology divides the saddle into five independent zones, each with a different foam and density, to best adapt to the different areas of the body and positions of the rider, while the Grip coating ensures that you never lose your grip and control.

The rail in Tirox (light-alloy steel) offers excellent resistance to shocks as well as lightness.

It is also available with a width of 155 mm for those looking for more comfort and sitting area.

VELO

維樂工業

<https://velosaddles.com>

Velo is a global bicycle parts supplier. Every year Velo produces over 15 million bicycle saddles, sells products in more than 100 countries, and offers a portfolio of more than 5,000 unique saddle models.

Velo's unrelenting efforts to advance its research and design comes to life by establishing four factories in Taiwan and mainland China. In 2020, Velo also extended its coverage to South East Asia. Over 40 years of hard work, perseverance and constantly advanced research and development have allowed Velo to become the leading manufacturer of world-class bicycle saddles, handlebar tapes, grips and e-bike injection parts.

E-MTB SADDLE VL-3575

Short nose design suitable for dexterous riding.

The saddle's base features a shock absorbing suspension system which extends from the center to both sides, this design enables the rider to easily transfer body weight and provides maximum comfort when riding or turning quickly.

The patented Atmos Shaping technology and the extra thick proprietary Airform padding provide excellent support for the seat cushion.

I-Carry hidden handle under the shell helps riders to carry and move their e-bikes easily whether going up and down.

E-CITY SADDLE VL-6535

For riders who enjoy a wide and comfortable seat.

The patented Atmos Shaping technology and the extra thick proprietary Airform padding provide excellent support for the seat cushion.

I-Carry hidden handle under the shell helps riders to carry and move their e-bikes easily whether going up and down.

Model VL-6535 ensures smooth riding with its prevention of road vibrations and absorption of shock during rougher terrain.

WAHOO FITNESS

台灣總代理：建來運動行銷

<https://www.klight.com.tw/brand-wahoo/>

Founded in 2009 by Chip Hawkins in Atlanta, GA, Wahoo creates innovative solutions to make hard fought goals attainable and lives better. Wahoo was built on the foundation of simplicity and the mindset that “there’s got to be a better way.”

KICKR BIKE

REAL-TIME PHYSICAL GRADE CHANGES

The KICKR BIKE simulates grade changes in real-time by not only providing changes in resistance, but also physically raising and lowering the bike to match ascents up to 20% and descents as steep as -15%.

+/- 1% POWER ACCURACY

Proven power accuracy that provides our most accurate power measurement of +/- 1% and generates up to 2200W of resistance.

PROGRAMMABLE VIRTUAL SHIFTING

Customize the KICKR BIKE shifting controls to match shifters from the leading manufacturers - SRAM, Shimano, and Campagnolo.

ELEMNT BOLT GPS BIKE COMPUTER

SIMPLE TO PERFORM

With an aerodynamic integrated out-front mount system, ELEMNT BOLT is purposefully designed to keep you focused on your performance and the ride ahead.

SIMPLE TO SEE

ELEMNT BOLT's vibrant display combines colorful highlights with PerfectView Zoom™, an ambient light sensor and quick-glance programmable LEDs, giving you the ability to focus on your ride data when it matters most.

EASY-SENSE BUTTONS

ELEMNT BOLT has three easy-sense convex top buttons. Their placement and tactile feel let you effortlessly locate them and toggle through workout screens—even when wearing long-finger gloves and more time focused on your ride.

SPEEDPLAY PEDALS

DUAL-SIDED ENTRY

SPEEDPLAY pedals' symmetrical form factor allows for dual-sided entry when clipping in. No more fumbling, fussing or kicking your pedal over; take off when the light turns green and clip in with ease.

ENHANCED WALKABILITY

The slim profile cleat and rubber texture create enhanced stability when walking in your road shoes off the bike.

OPTIMIZED BIOMECHANICS

The 3-axis adjustability and slim stack height of the SPEEDPLAY Advanced Pedal System allows the rider to customize their fit on the bike with the largest range of optionality. The lower stack height can allow for increased power transfer and a decreased saddle height, which results in reduced drag.

The slim profile cleat and rubber texture create enhanced stability when walking in your road shoes off the bike.

Wilderness Trail Bikes, Inc. Taiwan Branch (U.S.A.)

美商野外爬山單車有限公司 台灣分公司

www.wtb.com

WTB was founded in Marin County, California in 1982, fueled by the need to create durable and reliable mountain bike-specific equipment. Back then, mountain biking was a new and burgeoning sport, and bikes weren't much more than cobbled-together oddities. It's been 35 years and whether it's mountain, road, or gravel products, we're just as dedicated to improving the ride as we were back in 1982.

Saddle - SL8

Elegant, slight curves accentuate this inviting shape that redefines what comfort is capable of at such a low weight. From where the pavement ends, to B-road pursuits and cyclocross run-ups, our SL8 saddle provides irrefutable comfort in a minimalist, svelte package.

USAGE: Adventure Road - Gravel - Cross Country - Gravity

Tire - VULPINE

Vulpine is the latest race-focused addition to WTB's line of beloved gravel tires. Tightly spaced center knobs form a nearly uninterrupted centerline to decrease rolling resistance while the rest of the tread is packed with short knobs to further promote efficiency, minimize the chance of punctures, and deliver predictable cornering traction. Vulpine prioritizes all-out efficiency without sacrificing climbing or braking traction and is the perfect tire for gravel racers looking to lead the pack as well as daily riders in search of an efficient tire that excels on many surfaces including pavement, hardpack and gravel.

USAGE: Gravel

CONDITIONS: Pavement • Hardpack • Dirt • Gravel

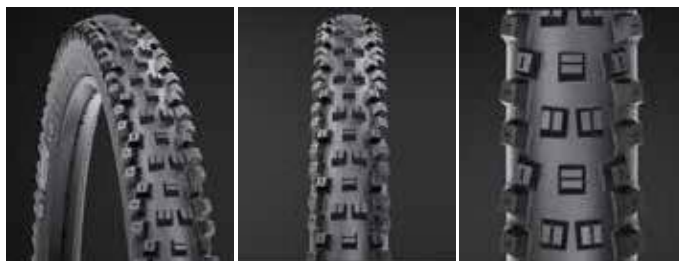

Tire - VIGILANTE 2.5/2.6/2.8

Aggressive, premier and unwavering...those were all words we used to describe the original Vigilante 2.3 and they still ring true about this updated Vigilante available in modern widths. Square-lugged knobs still deliver unwavering traction, yet with added height to ensure they dig even deeper into loose, unpredictable terrain. Increased circumferential spacing allows the tread to remain clear in sticky conditions as hefty outer knobs protect the sidewall while you send it down the chunkiest rock gardens.

USAGE: Trail • Enduro • Gravity

CONDITIONS: Dirt • Loose • Rocky • Wet

WINNING Enterprise Co., Ltd

曜輓企業有限公司

www.winning99.com.tw/en/

The WINNING enterprise was founded in 2001 in Zongtuliao Industrial Zone, Tainan City. It is dedicating to the production of bicycle plastic parts. It has years of experience in developing and designing OEMs and has obtained multiple patent certifications. In addition to constantly develop and design new products. Enhancing competitiveness, upholding the principle of quality, efficiency, service, in order to meet customers' satisfaction, selling the products to all over the world. We mainly produce bicycle and motorcycle plastic parts. Our business is getting better steadily with the cooperation between manufacturers, trust of customers and employees' hard working. The factory had a bigger scale and we built the new factory at Heshun Industrial Zone.

With years of experience in OEMs and development, we have won the trust of many customers all over the world, and stick to "high quality, efficiency, and service", leading the industry in production technology, product development, and process equipment. Made us be famous in this field of Taiwan. Our business is getting better steadily with the cooperation between manufacturers, trust of customers and employees' hard working. The factory had a bigger scale and relocated in 2019.

In 2019, we moved back to the Zongtuliao Industrial Zone, and acquired a new plant, covering an area of about 226.4km² and a building area of about 661.1km². We imported German-made Arburg injection machines which are more efficient in production capacity, space, and movement lines, and also provide employees a better and more comfortable working environment to improve the quality of our company, and continues to improve, serving customers with better quality and superior technology.

Our products have obtained a number of patent certifications, and fully comply with CPSIA, ROHS, REACH... and other inspections and tests.

Wood Field Power Machine Co., LTD.

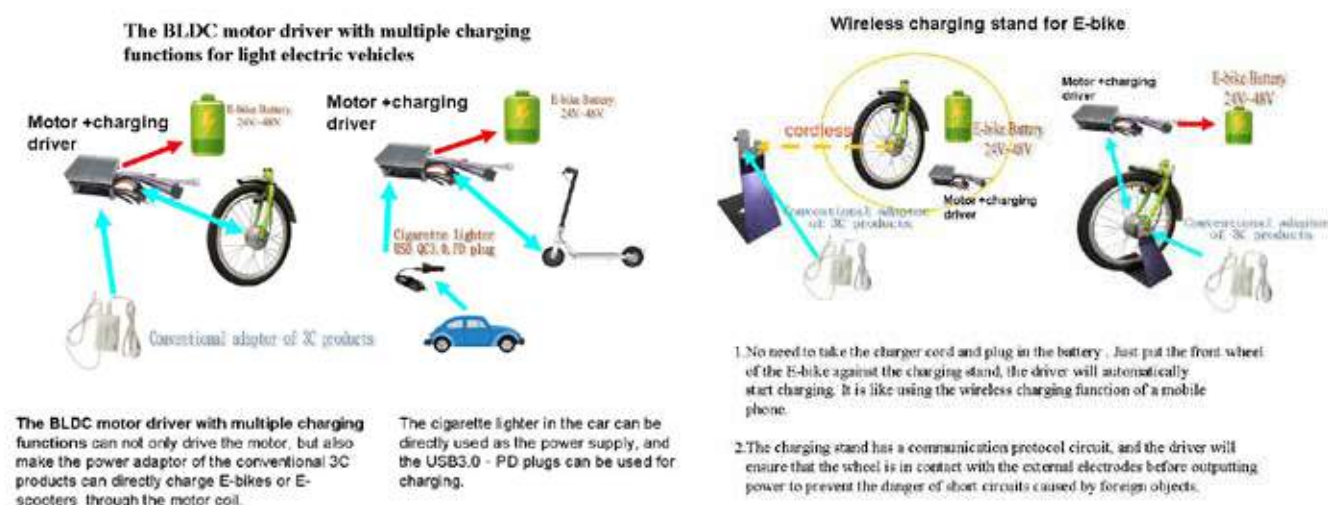

木田動力機械有限公司

www.facebook.com/WFPM168/

WFPM was founded by a senior optical disc drive servo control engineers who served in the Hsinchu Science Park before. It is expected that through the comprehensive consideration of integrated R&D capabilities from electronic hardware and control firmware to mechanical design, the products with performance and functional advantages can be done. The brush-less power module for high-pressure grouting machines has been successfully developed last year. WFPM plans to expand the product line to the application of electric bicycles this year.

The BLDC motor driver with multiple charging functions and the cordless charging stand for light electric vehicles.

The size of the BLDC motor driver with multiple charging functions is similar to the traditional motor driver. It can not only drive the motor, but also make the power adaptors of the conventional 3C products and the cigarette lighter in the car can directly charge E-bikes and E-scooters through the motor coil. It is convenient and environmentally friendly.

The torque sensor of electric power-assisted bicycles

Strain gauge sensing.

The mechanism and circuit are integrated into the crank.

Compatible with the tapered square, and easy to install.

Number of pulses (pulse/period): 40

Input voltage: 4.5 -5.5

Output voltage: 0.8 -4.2

Resolution (mv/N.m) 48 (adjustable)

Working temperature -10-60°C

BB width (mm): 68 or more

Installation position: Tapered square

Worldwide Inc.

德安百世實業股份有限公司

www.foss.com.tw

We are a brand, fearless and unstoppable. Always tread on the road to the unknown, always seek beauty in place that few can sense. The truth of aesthetics can be found in the little hub structure, tiny but sophisticate. We will keep going, as always. With hub and spokes, we can always tread on new road, and always roll back to you.

Zero Drag Silent Hub

1. Unique drive system.
2. Frictional force deduction.
3. Effective noise cancellation.
4. Save time.
5. Save strength.

Carbon Fiber Spoke

1. The main body of FOSS spoke is full carbon fiber
2. Light weight
3. High rigidity
4. Low ductility
5. Less force transmission cancellation when it comes to pedaling .
6. Forsake chemical gluing method.
7. Ensure no degumming by building mechanical structure.

Inner Tube

1. Explosion Proof: When pierced, the highly-polymerized material of the tube will create an air-tight seal around the object and prevent an immediate puncture which fully gives the riders more time to react.
2. High Elasticity: FOSS tube provides a superior ride quality due to high elasticity of the material which can actually reduce the rolling resistance.
3. Light-Weight&Environmentally Friendly Material: The material density is 0.88 g/cc. It is 30% lighter than traditional tubes (of the same thickness). And it is a recycled Environmentally Friendly material.

YOUNG SING BALL BEARING CO., LTD.

永興軸承有限公司

<https://ttn-bearing.com/?lang=en>

TTN was established on 1976 which is a professional bearing manufacturer in Taiwan. TTN Young Sing bearing production passed the IATF16949 quality system certification, and the products are RoHS, Reach, CPSIA, etc.

Strict export inspection standards have been widely used in all aspects of life, providing people with a colorful life at all times.

And contribute to the global green energy movement and resource protection.

We invest a lot of inspection equipment, Establish high-quality benchmarks to keep the market healthy and stable, and to value social welfare and environmental sustainability.

This will create a win situation for society, customers, companies, employees and enterprises, mutual benefit and increase competitiveness. High-quality business activities, provide consumers with guaranteed goods, and create a new civilized and trustworthy society are our basic goals.

Upholding a formal and sustainable business attitude, I am glad to be able to serve you and contribute to society.

Deep Groove Ball Bearing

1. High Precision
2. long life
3. low noise

Ultra thin Bearings

1. High quality
2. Wear-resistant and durable
3. Fast delivery

YUAN WEN SHING INDUSTRIES CORP.

源文興工業股份有限公司

www.yws.com.tw

Yuan Wen Sing Industries Corp. was established in 1975 as a manufacturer of bicycle accessories, including bells, locks, kickstands, handle bar lugs, indicator chain for Torpedo F&S speed hub or Sturmey-Archer speed hub, various pressed products and motorcycle locks.

YWS-SL2 CANBUS + RFID Smart Lock

1. Features: Can be intergrated with E-Bike system (use CANBUS protocol). A lock device which can work with IoT module / BLE module / E-Bike drive control system. YWS-SL2 not only suitable for general E-Bikes, especially suitable for rental E-Bikes.
2. Lock / Unlock Fuction: E-Bike system definition contrl device (BLE/IoT/Cloud or others) and E-Key (RFID Key Fob)
3. Power Input: 5V,12V,24V,48V (may need Voltage step-down Circuit Board)
4. Connector: 6 core waterproof connector (TBD)
5. Maximum Instantaneous Current: 60mA (estimated)
6. Standby Current Consumption: 20mA (estimated)
7. Continues Operation Times: 5,000+ Times with E-Bike

YWS-680 Grip Bell

Ring for your Bike / Neat and Tidy

1. Dome Size: 42mm, Total Width 28mm
(Take up space of Handlebar)
2. Material: Brass Top, Plastic Base
3. Color: Silver/Black/Gold
4. Operation: Knocking
5. Special Design: Install into handlebar.
Great sound and neat looking.

YWS-965 Strip Bell

Fits Multi-Size Handlebar, Loud and clear sound.
Suitable for E-bike.

ZENO Bicycle Component Co., LTD.

勝堯有限公司

www.zenocycleparts.com

ZENO Bicycle Component Co, LTD found as a brand in 2014 who established by an enthusiastic design team of bicycle parts. Focus on developing and producing innovative bicycle products with high quality such as Q-Connector hydraulic quick coupler system, SpeedLink universal hose connector, CapLock Anti-theft parts. Since 2018, it has been favored by the Taipei Cycle D&i Award and the internationally renowned design competition RedDot. ZENO's product range has the disc brake, hydraulic coupler, brake rotor, brake adaptor, brake pads, brake hose, Anti-theft parts, and cable system parts.

Q-Connector Hydraulic Quick Coupler System

Winner of 2021 RedDot & TAIPEI CYCLE d&i awards 2021

1. No tool required: Simply disconnect and connect the brake system with a fixed clip.
2. High Pressure Standard: Can stand at least 4500 psi provides highly safe care
3. Universal & Flexible: Able to work on most brake systems and different hose section
4. Automatic stop brake Fluid: The oil circuit automatically closed during disconnected
5. Easy setup: Only need an 8mm open wrench to set up
6. Compact size: Sized to easily be integrated

CapLock Anti-Theft Parts

Winner of TAIPEI CYCLE d&i awards 2021

Bicycles with stolen parts are often seen in metropolises. Whether it is missing wheels or missing seats, U locks can prevent theft of the entire vehicle, But it does not prevent thieves from stealing parts. Zeno uses a little ingenuity to make the parts anti-theft by gravity and completely protect your beloved bicycle without any keys. The CapLock series products include the following parts range.

Seat post collar size: 28.6mm, 31.8mm, 34.9mm

Wheelset 5mm QR and length 100mm and 135mm

The anti-theft nut for the shifter hub and motor hub. standard: M9, M10, 3/8", and M12.

SpeedLink Universal Hydraulic Connector system

SpeedLink, the new revolutionary product for Bicycle Hydraulic Brake system.

1. Make hydraulic bleeding work easier: Only need an 8mm wrench to setup
2. Work speed up: Just a few steps can easily setup hydraulic hose
3. Able to reusing - save money: Parts can be reused not like traditional hydraulic parts
4. Universal - available to the most brake system: Only 8 parts can fit with all mainstream brakes on the market.

3MEN Technology Co., Ltd.

群真科技股份有限公司

www.txmotion.com.tw

- 3Men Technology has 26 years' experiences in system integration, motor design and controller development.
- 3Men Technology has more than 10 years' experiences in power assisted system development.

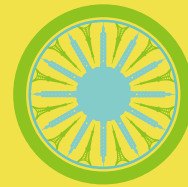

Our control system and battery has got ISO EN13849-1 Certificate.

- 3Men Technology has more than 4 years' experiences in public sharing e-bike system integration. It includes I.O.T design and remote monitor software / hardware development.

Power Assisted System

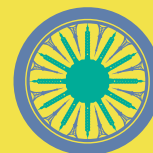

- It is light weight design. The whole system is below 4 kg, including battery and motor.
- We integrate pedal sensor with rear hub motor. It is easy to design e-bike frame and keeps original B.B.
- Our system can fit original e-bike design and aftermarket simultaneously.
It only needs to knit a new rear hub motor wheel and install battery.
- You only use power switch to select human or power assisted operation.
Intelligent control system makes ebike's operation same as before.
It's just easier.
