## Taiwan International Water Week: Your Gateway to Water Innovation and Sustainability!

Join TIWW from October 29-31, 2025, at Taipei Nangang Exhibition Center, Hall 1  
**Unlock Your Future Opportunities in the Thriving Asia-Pacific Water Market.**

In recent years, Taiwan has grappled with water scarcity challenges due to recurrent droughts, the reshoring of manufacturing operations, and the expanding semiconductor manufacturing sector. These factors have propelled authorities to actively seek solutions to ensure a stable water supply.

Having invested over US\$57 billion in recent years for water infrastructure, including wastewater treatment plants, seawater desalination facilities, and reservoir interconnecting pipelines, Taiwan has excelled in the field of water recycling and wastewater treatment technologies and provides immense business opportunities.

Moreover, to address the growing water demand, further enhancements were made by the Taiwanese government in 2023 with a special budget for 11 new wastewater treatment plants and six desalination plants slated for completion by 2027 and 2028, respectively. For 2025, the Taiwanese government has allocated approximately US\$17.5 billion for water management, a significant 40% budget increase compared to 2024, demonstrating its strong commitment to water resources.

Aligned with SDG 6 and growing market demands, this year's TIWW focuses on three themes—**Water Technology, Water Resilience, Water Quality** — and invites companies to exhibit across six key areas: **Water & Wastewater Treatment, Automation, Process Control & Digitalization, Environmental & Hydraulic Engineering, Transport & Storage, Environmental & Water Engineering, Storage & Transportation, Water Purification Equipment & Drinking Water, and Certification & Other Services.** Showcase your innovations, connect with global buyers, and seize the growing opportunities in the booming water resource market. Let's build a sustainable water future together!
